### **Theoretical Modeling of Organohalide Perovskites for Photovoltaic Applications** Giacomo Giorgi, Koichi

Yamashita, 2017-07-12 Perovskites are a class of recently discovered crystals with a multitude of innovative applications. In particular, a lead role is played by organic inorganic halide perovskites (OIHPs) in solar devices. In 2013, *Science* and *Nature* selected perovskite solar cells as one of the biggest scientific breakthroughs of that year. This book provides the first comprehensive account of theoretical aspects of perovskite solar cells starting at an introductory level but covering the latest cutting edge research. *Theoretical Modeling of Organohalide Perovskites for Photovoltaic Applications* aims to provide a theoretical standpoint on OIHPs and on their photovoltaic applications with particular focus on the issues that are still limiting their usage in solar cells. This book explores the role that organic cations and defects play in the material properties of OIHPs and their effects on the final device in addition to discussing the electric properties of OIHPs, environmentally friendly alternatives to the use of lead in their structural and electronic properties, theoretical screening for OIHP related material for solar to energy conversion and the nature and the behavior of quasiparticles in OIHPs. *Spacewear* Barbara

Brownie, 2019-01-10 Today we are living in the New Space Age where mass commercial space travel is almost within our grasp. This otherworldly possibility has opened up new cultural images of space both real and fictional and has caused fashion design and spacesuit engineering to intersect in new exciting ways. *Spacewear* traverses this uncharted territory by exploring the changing imagination of space in fashion and fashion in space from the first Space Age to the 21st century. Exploring how space travel has stylistically and technologically framed fashion design on earth and how we need to revisit established design practices for the weightless environment, *Spacewear* connects the catwalk and the space station. This book draws together speculative fantasies in sci-fi films such as *Star Trek* and *2001: A Space Odyssey* with the engineered spacesuits, Biosuits and the NASA Z-2 and with catwalk interpretations by the likes of Alexander McQueen, Hussein Chalayan, Andr  Courr ges and Iris van Herpen. While the development of commercial space agencies has led to new concerns for style in garments for outer space that rethink fundamental design principles such as drape, high fashion has experimented with new possibilities for weightlessness that extend far beyond the 1960s vision of Space Age metallic fabrics and helmet style headwear. Brownie takes the reader on a fascinating journey from fantasy to function and to form, deepening our understanding of this new category of fashion that is prompting new approaches to garment design and construction both on earth and in outer space. [ACL Injuries in the Female Athlete](#) Frank R. Noyes, Sue Barber-Westin, 2018-09-07 This

successful book, now in a revised and updated second edition, reviews all aspects of anterior cruciate ligament (ACL) injuries in female athletes with the focus on complete noncontact ACL injuries. The opening section discusses anatomy and biomechanics and explains the short and long term impacts of complete ACL ruptures, including long term muscle dysfunction and joint arthritis. Risk factors and possible causes of the higher noncontact ACL injury rates in female athletes

compared with male athletes are then discussed in depth Detailed attention is devoted to neuromuscular training programs and their effectiveness in reducing noncontact ACL injury rates in female athletes as well as to sports specific ACL injury prevention and conditioning programs of proven value Rehabilitation programs after ACL injury and reconstruction that reduce the risk of a future injury are explored and the concluding section looks at worldwide implementation of neuromuscular ACL injury prevention training and future research directions The book will be of value to orthopedic surgeons physical therapists athletic trainers sports medicine primary care physicians and strength and conditioning specialists

Corrosion and Stress Corrosion Testing of Aerospace Vehicle Structural Alloys Russell Wanhill, Michael Windisch, 2018-05-24 This SpringerBrief discusses the determination and classification of the ambient temperature corrosion and stress corrosion properties of aerospace structural alloys with emphasis on 1 aluminium alloys modern 3rd generation aluminium lithium alloys stainless steels and titanium alloys and 2 some of the issues involved Standard reference data on environmental properties including corrosion and stress corrosion are mandatory for the qualification and certification of materials for aerospace vehicles and also for the design of actual structures and components Recommendations for further testing and evaluation are given at appropriate points in the text The book concludes with a summary of the main topics

*Muscle Recovery After Exercise, Training and Competition: Physiological Indicators and Non-invasive Monitoring Techniques* Alessandro Moura Zagatto, Fábio Yuzo Nakamura, Michael R. Esco, 2020-05-21 The desire to improve muscle function and prevent overuse injuries from exercise and throughout training has led to the development of various methods to aid recovery and track readiness to perform Ergogenic aids such as cold water immersion massage and dynamic recovery procedures may have positive effects but the results of the related research remain equivocal Furthermore novel interventions in this scenario like compression garments ice vests and photobiomodulation therapy are promising but need more evidence based data to support their effectiveness Similarly to properly monitor individual physical conditioning there is a growing interest toward unobtrusive measures to accurately represent physiological status during and or after exercise There are several techniques being used such as subjective ratings of well being heart rate monitoring hormonal and hematological profile assessments However more sensitive indexes like heart rate variability and muscle activation voluntary and or involuntary are arising as attractive alternatives that may delineate physical conditioning status and readiness to perform more precisely than the aforementioned measures The purpose of this Research Topic is to critically evaluate and summarize recent data from observational and intervention studies related to non invasive methods designed to promote recovery and objectively monitor training status Their association to physical performance and physiological recovery in athletes during training and competition is a major focus of this Topic

**Wearable Sensor Technology for Monitoring Training Load and Health in the Athletic Population** Billy Sperlich, Hans-Christer Holmberg, Kamiar Aminian, 2020-02-13 Several internal and external factors have been identified to estimate and control the psycho biological stress of training in order to optimize training responses and to avoid fatigue overtraining and other undesirable health effects of an athlete An increasing number of lightweight sensor based wearable technologies wearables have entered the sports technology market Non invasive sensor based wearable technologies could transmit physical physiological and biological data to computing

platform and may provide through human machine interaction smart watch smartphone tablet bio feedback of various parameters for training load management and health However in theory several wearable technologies may assist to control training load but the assessment of accuracy reliability validity usability and practical relevance of new upcoming technologies for the management of training load is paramount for optimal adaptation and health
