Carter,1995-05-11 This marvelous book of pictures illustrates the fundamental concepts of geometric topology in a way that is very friendly to the reader The first chapter discusses the meaning of surface and space and gives the classification of orientable surfaces In the second chapter we are introduced to the M bius band and surfaces that can be constructed from this non orientable piece of fabric In chapter 3 we see how curves can fit in surfaces and how surfaces can fit into spaces with these curves on their boundary Basic applications to knot theory are discussed and four dimensional space is introduced In Chapter 4 we learn about some 3 dimensional spaces and surfaces that sit inside them These surfaces help us imagine the structures of the larger space Chapter 5 is completely new It contains recent results of Cromwell Izumiya and Marar One of these results is a formula relating the rank of a surface to the number of triple points The other major result is a collection of examples of surfaces in 3 space that have one triple point and 6 branch points These are beautiful generalizations of the Steiner Roman surface Chapter 6 reviews the movie technique for examining surfaces in 4 dimensional space Various movies of the Klein bottle are presented and the Carter Saito movie move theorem is explained The author shows us how to turn the 2 sphere inside out by means of these movie moves and this illustration alone is well worth the price of the book In the last chapter higher dimensional spaces are examined from an elementary point of view This is a guide book to a wide variety of topics It will be of value to anyone who wants to understand the subject by way of examples Undergraduates beginning graduate students and non professionals will profit from reading the book and from just looking at the pictures **The**

**Political Economy of Education in South Asia** John Richards,Manzoor Ahmed,Md. Shahidul Islam,2021-12-23 With the exception of Sri Lanka South Asian countries have not achieved quality basic education an essential measure for escaping poverty inequality and social exclusion In *The Political Economy of Education in South Asia* John Richards Manzoor Ahmed and Shahidul Islam emphasize the importance of a dynamic system for education policy *The Political Economy of Education in South Asia* documents the weak core competency reading and math outcomes in government primary schools in India Pakistan Bangladesh and Nepal and the consequent rapid growth of non government schools over the last two decades It

compares the training hiring and management of teachers in South Asian schools to successful national systems ranging from Singapore to Finland Discussing reform options it makes the case public good and public priorities are better served when both public and non government providers come under a strong public policy and accountability framework The Political Economy of Education in South Asia draws on the authors broad engagement in education research and practice in South Asia as well as analysis by prominent professors of education and NGO leaders to place basic education in a broad context and make the case that universal literacy and numeracy are necessary foundations for economic growth
