The Politics of Climate Change Knowledge Nowrin Tabassum, 2022-03-03 This book addresses political knowledge of climate change and its relation to labelling people affected by climate change, either as climate refugees or as climate change-induced displaced people or migrants. By questioning the knowledge of climate change and subsequent labelling of people, this book will spark debate in studies of global climate politics and transnational policy networks. Rather than considering the issue of climate change as a given phenomenon, the author explores how the politicized knowledge of climate change has been produced in international negotiations and how that knowledge is transmitted from global forums to local country levels via climate change action plans and resilience projects. This book introduces the concept of multi-scalar knowledge brokers (MKBs), individual actors who work at multiple levels, local, national, and international, to transmit the knowledge of climate change from global level to local level. The author uses the primary case study of Bangladesh to demonstrate how the dominant actors in global climate politics, the Intergovernmental Panel on Climate Change (IPCC), the United Nations Framework Convention on Climate Change (UNFCCC), and the World Bank, as well as the USA and the UK, interact with the government and local NGOs in Bangladesh regarding transmitting the knowledge of climate change, labelling the uprooted people, and implementing resilience projects. This book will be of interest to students, scholars, and practitioners of international relations, environmental politics, climate change studies, political ecology, political geography, and migration and displacement studies. How the Police Generate False Confessions James L. Trainum, 2016-07-15 Despite the rising number of confirmed false confession cases most people have a hard time grasping why someone would confess to a crime they did not commit or even why a guilty person would admit to something that could put them in jail for life How the Police Generate False Confessions takes you inside the interrogation room exposing the tactics that law enforcement uses to make confessions happen James L. Trainum reveals how innocent people can become suspects and then confessed criminals even when they have not committed a crime Using real stories he looks at the inherent coerciveness of the interrogation process and why so many false confessions contain so many of the details that only the true perpetrator would know More disturbingly the book examines how these same processes corrupt witness and victim statements create lying informants and cooperators and induce innocent people to plead guilty Trainum also offers recommendations for change in the U.S. by looking at how other countries are changing the process to prevent such miscarriages of justice The reasons that people falsely confess can be complex and varied throughout How the Police Generate False Confessions Trainum encourages readers to critically evaluate confessions on their own by gaining a better understanding of the interrogation process
