

WIRELESS CONNECTIONS

To prevent short circuits from occurring, while making connections, keep the battery's negative terminal disconnected.

We recommend that you make all electrical connections (see Fig. 1) before installing the unit. If you're not sure of your ability to install this unit correctly, have it installed by a qualified service technician.

Notes:

This unit is designed for use in cars with a 12-volt DC, negative ground power supply. If your vehicle does not have a 12-volt negative ground electrical system, you will need a voltage inverter which can be bought from a JVC car audio dealer. (Be sure to ground this unit to the car's chassis.)
