Lander Type Of Oil Service Reset:

The Great Reset Richard Florida, 2010-04-27 We tend to view prolonged economic downturns such as the Great Depression of the 1930s and the Long Depression of the late nineteenth century in terms of the crisis and pain they cause But history teaches us that these great crises also represent opportunities to remake our economy and society and to generate whole new eras of economic growth and prosperity In terms of innovation invention and energetic risk taking these periods of creative destruction have been some of the most fertile in history and the changes they put into motion can set the stage for full scale recovery In *The Great Reset* bestselling author and economic development expert Richard Florida provides an engaging and sweeping examination of these previous economic epochs or resets He distills the deep forces that have altered physical and social landscapes and eventually reshaped economies and societies Looking toward the future Florida identifies the patterns that will drive the next Great Reset and transform virtually every aspect of our lives from how and where we live to how we work to how we invest in individuals and infrastructure to how we shape our cities and regions Florida shows how these forces when combined will spur a fresh era of growth and prosperity define a new geography of progress and create surprising opportunities for all of us Among these forces will be new patterns of consumption and new attitudes toward ownership that are less centered on houses and cars the transformation of millions of service jobs into middle class careers that engage workers as a source of innovation new forms of infrastructure that speed the movement of people goods and ideas a radically altered and much denser economic landscape organized around megaregions that will drive the development of new industries new jobs and a whole new way of life We've weathered tough times before They are a necessary part of economic cycles giving us a chance to clearly see what's working and what's not Societies can be reborn in such crises emerging fresh strong and refocused Now is our opportunity to anticipate what that brighter future will look like and to take the steps that will get us there faster With his trademark blend of wit irreverence and rigorous research and analysis Florida presents an optimistic and counterintuitive vision of our future calling into question long held beliefs about the nature of economic progress and forcing us to reassess our very way of life He argues convincingly that it's time to turn our efforts as individuals as governments and as a society to putting the necessary pieces in place for a vibrant prosperous future
