Smart Metering Applications Nikolaos Efkarpidis, Martin Geidl, Holger Wache, Marco Peter, Marc Adam, 2022-10-03 This book presents a large number of smart metering applications from the points of view of different stakeholders. The applications are clustered with respect to three types of stakeholders: a) end customers, b) energy service providers, and c) authorities, research institutions, or other organizations. A business case for each application is created that can provide guidelines to the stakeholders involved in its realization. The book additionally investigates current business models for smart metering applications. A survey on the current techno-economic potential of such applications is conducted based on a questionnaire filled by various stakeholders. The book will be of interest to academic research institutions but also engineers in industry, authorities, or other organizations.
