Life Orientation Grade11 November Exam 2014:

From Predator to Prey Letlhokwa George Mpedi, 2025-10-31 In the stillness of the African bush leadership reveals itself in its most primal form Here where the survival of each species depends on discipline instinct coordination and trust its lessons arise from the most unexpected sources For Letlhokwa George Mpedi a journey through South Africa's Kruger National Park transformed from merely a game drive to a masterclass in leadership Observing the intricate dynamics of animal behaviour Letlhokwa began to trace compelling parallels between the natural order and human systems of power Through this lens this book explores how nature's codes can inform leadership dynamics Drawing from a distinctly African approach to leadership which emphasises community and interdependence From Predator to Prey explores the unwritten rule of law that governs the wild and its applications for humanity From the silent cooperation of lionesses on a hunt to the matriarchal approach of elephants and even the territorial instincts of wild dogs this book offers a vivid and thought provoking perspective on how nature's instincts can inform our understanding of leadership dynamics As Letlhokwa tracks and interprets the behaviours and strategies of various species he challenges conventional ideas of leadership based solely on top down control Through this observation he invites a critical rethinking of conventional leadership paradigms In place of rigid hierarchies he presents a model that values the very tenets of ubuntu leadership as he offers a compelling argument for leadership rooted in nature's enduring logic Letlhokwa George Mpedi is a Professor of Labour and Social Security Law and the Vice Chancellor and Principal of the University of Johannesburg UJ He completed his B Juris degree 1996 and LLB degree 1998 at Vista University In 2001 the LLM degree in Labour Law was conferred upon him by the then Rand Afrikaans University now UJ and the LLD degree in Mercantile Law was conferred upon him in 2006 by UJ

The long and short of mental time travel-- self-projection over time-scales large and small James M. Broadway, Claire M. Zedelius, Jonathan W.

Schooler, Simon Grondin, 2015-07-02 Researchers working in many fields of psychology and neuroscience are interested in the temporal structure of experience as well as the experience of time at scales of a few milliseconds up to a few seconds as well as days months years and beyond This Research Topic supposes that broadly speaking the field of time psychology can be organized by distinguishing between perceptual and conceptual time scales Dealing with conceptual time mental time travel also called mental simulation self projection episodic semantic memory prospection foresight allows humans and perhaps other animals to imagine and plan events and experiences in their personal futures based in large part on memories of their personal pasts as well as general knowledge Moreover contents of human language and thought are fundamentally organized by a temporal dimension enmeshed with it so thoroughly that it is usually expressible only through spatial metaphors But what might such notions have to do with experienced durations of events lasting milliseconds up to a few seconds during the so called present moment of perception action cycle time This Research Topic is organized around the general premise that by considering how mental time travel might scale down to time perception and vice versa no less progress and integrative synthesis within and across scientific domains might be facilitated Bipolar configurations of future

and past orientations of the self may be repeated in parallel across conceptual and perceptual time scales subsumed by a general Janus like feedforward feedback system for goal pursuit As an example it is notable that the duality of prospection and semantic episodic memory operating at conceptual time scales has an analogue in perception action cycle time namely the interplay of anticipatory attention and working memory Authors from all areas of psychology and neuroscience are encouraged to submit articles of any format accepted by the journal Original Research Methods Hypothesis Theory Reviews etc which might speak to questions about time and temporal phenomena at long and or short time scales
