mathematical manuscripts of Marx These texts have been divided into three parts Part one contains some topical texts related to the history of emergence development editing publication and reception of the mathematical manuscripts of Karl Marx Part two contains a selection of five articles reflecting some of the investigations inspired by these manuscripts in Russia India and France Part three contains five articles on plural mathematics before and after Karl Marx 1818 1883 The texts in this collection are followed by two appendices containing two bibliographies one on Hegel and mathematics and the other on mathematics and semiotics Please note This title is co published with Aakar Books Bew Delhi Taylor Francis does not sell or distribute the print edition in South Asia India Sri Lanka Nepal Bangladesh Pakistan Maldives or Bhutan

Essential Mathematics and Statistics for Forensic Science Craig Adam, 2011-09-20 This text is an accessible student friendly introduction to the wide range of mathematical and statistical tools needed by the forensic scientist in the analysis interpretation and presentation of experimental measurements From a basis of high school mathematics the book develops essential quantitative analysis techniques within the context of a broad range of forensic applications This clearly structured text focuses on developing core mathematical skills together with an understanding of the calculations associated with the analysis of experimental work including an emphasis on the use of graphs and the evaluation of uncertainties Through a broad study of probability and statistics the reader is led ultimately to the use of Bayesian approaches to the evaluation of evidence within the court In every section forensic applications such as ballistics trajectories post mortem cooling aspects of forensic pharmacokinetics the matching of glass evidence the formation of bloodstains and the interpretation of DNA profiles are discussed and examples of calculations are worked through In every chapter there are numerous self assessment problems to aid student learning Its broad scope and forensically focused coverage make this book an essential text for students embarking on any degree course in forensic science or forensic analysis as well as an invaluable reference for post graduate students and forensic professionals Key features Offers a unique mix of mathematics and statistics topics specifically tailored to a forensic science undergraduate degree All topics illustrated with examples from the forensic science discipline Written in an accessible student friendly way to engage interest and enhance learning and confidence Assumes only a basic high school level prior mathematical knowledge

Intelligent Computer Mathematics Serge Autexier, Jacques Calmet, David Delahaye, P.D.F. Ion, Laurence Rideau, Renaud Rioboo, Alan Sexton, 2010-06-29 This book constitutes the joint refereed proceedings of the 10th International Conference on Artificial Intelligence and Symbolic Computation AISC 2010 the 17th Symposium on the Integration of Symbolic Computation and Mechanized Reasoning Calculemus 2010 and the 9th International Conference on Mathematical Knowledge Management MKM 2010 All submissions passed through a rigorous review process From the 25 papers submitted to AISC 2010 9 were selected for presentation at the conference and inclusion in the proceedings volume A total of 14 papers were submitted to Calculemus of which 7 were accepted MKM 2010 received 27 submissions of which 16 were accepted for presentation and publication The events focused

on the use of AI techniques within symbolic computation and the application of symbolic computation to AI problem solving the combination of computer algebra systems and automated deduction systems and mathematical knowledge management respectively

Pi: The Next Generation David H. Bailey, Jonathan M. Borwein, 2016-07-19 This book contains a compendium of 25 papers published since the 1970s dealing with pi and associated topics of mathematics and computer science The collection begins with a Foreword by Bruce Berndt Each contribution is preceded by a brief summary of its content as well as a short key word list indicating how the content relates to others in the collection The volume includes articles on actual computations of pi articles on mathematical questions related to pi e g Is pi normal articles presenting new and often amazing techniques for computing digits of pi e g the BBP algorithm for pi which permits one to compute an arbitrary binary digit of pi without needing to compute any of the digits that came before papers presenting important fundamental mathematical results relating to pi and papers presenting new high tech techniques for analyzing pi i e new graphical techniques that permit one to visually see if pi and other numbers are normal This volume is a companion to Pi A Source Book whose third edition released in 2004 The present collection begins with 2 papers from 1976 published by Eugene Salamin and Richard Brent which describe quadratically convergent algorithms for pi and other basic mathematical functions derived from some mathematical work of Gauss Bailey and Borwein hold that these two papers constitute the beginning of the modern era of computational mathematics This time period 1970s also corresponds with the introduction of high performance computer systems supercomputers which since that time have increased relentlessly in power by approximately a factor of 100 000 000 advancing roughly at the same rate as Moore s Law of semiconductor technology This book may be of interest to a wide range of mathematical readers some articles cover more advanced research questions suitable for active researchers in the field but several are highly accessible to undergraduate mathematics students

Dynamical Systems and Methods Albert C. J. Luo, José António Tenreiro Machado, Dumitru Baleanu, 2011-09-30 Nonlinear Systems and Methods For Mechanical Electrical and Biosystems presents topics observed at the 3rd Conference on Nonlinear Science and Complexity NSC focusing on energy transfer and synchronization in hybrid nonlinear systems The studies focus on fundamental theories and principles analytical and symbolic approaches computational techniques in nonlinear physical science and mathematics Broken into three parts the text covers Parametrical excited pendulum nonlinear dynamics in hybrid systems dynamical system synchronization and N 1 body dynamics as well as new views different from the existing results in nonlinear dynamics mathematical methods for dynamical systems including conservation laws dynamical symmetry in nonlinear differential equations and invex energies and nonlinear phenomena in physical problems such as solutions complex flows chemical kinetics Toda lattices and parallel manipulator This book is useful to scholars researchers and advanced technical members of industrial laboratory facilities developing new tools and products

The Chemical Element Javier García-Martínez, Elena Serrano-Torregrosa, 2011-09-19 In the International Year of Chemistry prominent

scientists highlight the major advances in the fight against the largest problems faced by humanity from the point of view of chemistry showing how their science is essential to ensuring our long term survival Following the UN Millennium Development Goals the authors examine the ten most critical areas including energy climate food water and health All of them are opinion leaders in their fields or high ranking decision makers in national and international institutions Intended to provide an intellectual basis for the future development of chemistry this book is aimed at a wide readership including students professionals engineers scientists environmentalists and anyone interested in a more sustainable future

Digital Technologies in the Lives of Young People Chris Davies, John Coleman, Sonia Livingstone, 2015-10-14 This book examines the presence and effects of new technologies in the lives of young people The rapid pace of change in the development and use of digital technologies and the likely impact this has on youth means that the topic has wide implications for educational institutions theory and practice There is a demand for a concentration on the ways in which new devices such as smart phones and tablets as well as new platforms and recent notions such as the flipped classroom are affecting the way education is being provided However there is also still a small minority who do not have full access to the internet and the disadvantages suffered by this group must also be addressed The internet offers a vast range of opportunities for young people and yet for various reasons it is not always available This can partly be attributed to the controls that schools impose on the use of digital technology for reasons of safety and security and can in part be explained by the fact that policy makers have contradictory attitudes to technology While they may argue for the need to have a well educated and well trained workforce they fear the threats to privacy and safety posed by the internet This book asserts that society needs to have more open debate about the threats and opportunities of digital technology as it is a dynamic and ever changing topic for us all This book was originally published as a special issue of the Oxford Review of Education

Transnational Policy Flows in European Education Andreas Nordin, Daniel Sundberg, 2014-05-12 International comparisons of educational achievements have come to play a crucial role in understanding the educational field today This book provides an in depth analysis of the development of international large scale assessments The lives and achievements of transnational educational experts who paved the way for these assessments are discussed as well as the rise of institutions specialising in the making and managing of educational statistics such as the International Association for the Evaluation of Educational Achievements IEA and the Programme for International Student Assessment PISA supported by the Organisation

for Economic Cooperation and Development OECD Emerging transnational policy spaces and their effect on national education policy are also problematised using the concept of Europeanisation as a theoretical reference By bringing together historical and contemporary comparisons using different methodological approaches the goal of this book is to contribute to a widened understanding of educational policy making as an open ended and complex process that cannot be reduced to a rational process of linear implementation or a deduction of world models of education Instead the result of this book shows that transnational policy flows in many directions in European education today and is being negotiated translated interpreted or even contested when recontextualised in different national and or local arenas This book addresses crucial questions on how the landscape and its borders of educational knowledge and policy making have changed over time and place and how the map is currently redrawn in the contemporary globalised educational context It provides important navigational knowledge for students teachers and researchers as well as policy makers at different levels

Risk Measures with Applications in Finance and Economics Michael McAleer, Wing-Keung Wong, 2019-07-23 Risk measures play a vital role in many subfields of economics and finance It has been proposed that risk measures could be analysed in relation to the performance of variables extracted from empirical real world data For example risk measures may help inform effective monetary and fiscal policies and therefore the further development of pricing models for financial assets such as equities bonds currencies and derivative securities A Special Issue of Risk Measures with Applications in Finance and Economics will be devoted to advancements in the mathematical and statistical development of risk measures with applications in finance and economics This Special Issue will bring together the theory practice and real world applications of risk measures This book is a collection of papers published in the Special Issue of Risk Measures with Applications in Finance and Economics for Sustainability in 2018
