Charles Saunders, Marshall Miller & Assoc.

This memorandum and associated maps, attachments and data sets comprise our Annual Monitoring Report for all work conducted in calendar year 2006 for inbound sediment analyses, ground and surface water monitoring, hydrogeologic modeling and beneficial use study requirements for VPA Permit No. VPA00579. The original monitoring plan submitted to DEQ by American Land Concepts (ALC) in November, 2000, focused on the Woodrow Wilson Bridge (WWB) sediment utilization area (Fig. 1). This approved monitoring plan served as the basis for our protocols and designs through mid 2004. On September 7, 2004, Virginia DEQ approved a modification to the monitoring plan as outlined below that reduced the number of water quality sampling points and frequency. Subsequently, in June 2005, DEQ approved a further modification to the permit and monitoring requirements to allow placement of a new source of dredge materials (Earle Naval Weapons Station - Earle) into a separate utilization basin as shown in Fig. 2. In July of 2005, modifications to the Operations and Maintenance Manual and Monitoring Plans for both utilization areas were approved by DEQ.

Review of our last annual report (2/14/06) generated a number of comments and queries from your office in May through September of 2006 that will be referred to later in this report. This report for 2006 includes data and analyses relative to both utilization areas (WWB and Earle) plus an overall assessment of site hydrologic conditions for both basins as detailed later.

In 2006, permit coordinate and liaison responsibilities for this permit were transferred from ALC to Marshall Miller and Associates (MMA) who we have worked with closely over the past year. Virginia Tech and Old Dominion University (ODU) continue to serve as subcontractors to Weanack Land LLP to carry out the monitoring and research specified in the approved plans.
