Ferguson, M. Brian Fennerty, 2006-01-16 Although GERD was initially described in the early 19 century it is essentially a c sequence of our modern day largesse Dietary factors and associated obesity have combined with as yet other unknown factors e g a decrease in the prevalence of H pylori to make GERD one of the most common diseases affecting western society It is estimated that up to 20 million adults in the United States suffer from GERD and treatment of these individuals consumes approximately 10 billion annually the majority of it for prescription drugs used

to manage the disease and its symptoms Fortunately despite challenges presented by co factors resulting in GERD diet obesity etc therapy of GERD is largely successful However even a low failure rate for a therapy used in the management of GERD still results in large numbers of affected patients because of the high prevalence of this disease Use of a conservative estimate of a failure rate of 5% translates to 1 million ineffectively treated and unhappy patients How to manage these patients is the subject of this book Why is publication of this book important now Several factors prompted us to work on this project Mature results for proton pump inhibitor use are available making this an appropriate time to review outcomes of PPI therapy of GERD Similarly mature results are now available for minimally invasive surgical therapy for GERD Twenty Years of G-CSF Graham Molineux, MaryAnn Foote, Tara Arvedson, 2012-01-05 Granulocyte colony stimulating factor G CSF or GCSF is a secreted glycoprotein that stimulates the proliferation and differentiation of granulocyte precursor cells and induces mobilization of peripheral blood progenitor cells from the bone marrow Development of recombinant human G CSF has had a profound impact on the treatment of many diseases including severe chronic neutropenia and cancer and has enabled peripheral stem cell transplantation to supplant bone marrow transplantation in the autologous setting This Milestones in Drug Therapy volume describes the experience of the last 20 years of treatment with recombinant human G CSF including the basic science the use of recombinant human G CSF in both the oncology and nononcology settings and the safety and economics of its use Many of the authors were the original investigators of recombinant human G CSF and other authors are key researchers who provide their outlook for the next 20 years for use of and research with recombinant human G CSF
