

CHAPTER 2 REVIEW

Measurements and Calculations

SECTION I

SHORT ANSWER Answer the following questions in the space provided.

1. Determine whether each of the following is an example of observation and data, a theory, a hypothesis, a control, or a model:

_____ observation and data

_____ observation and data

_____ control

_____ hypothesis

- a. A research team records the rainfall in inches per day in a prescribed area of the rain forest. The square footage of vegetation and relative plant density per square foot are also measured.
- b. The intensity, duration, and time of day of the precipitation are noted for each precipitation episode. The types of vegetation in the area are recorded and classified.
- c. The information gathered is compared with the data on the average precipitation and the plant population collected over the last 18 years.
- d. The information gathered by the research team indicates that rainfall has decreased significantly. They propose that deforestation is the primary cause of this phenomenon.

2. "When 1.00 g of a white, crystalline sugar are dissolved in 100 mL of water, the solution is observed to freeze at -0.54°C , not 0°C . The system is denser than pure water." Which parts of these statements represent quantitative information, and which parts represent qualitative information?

Quantitative values include the mass of sugar, volume of water, and observed freezing point. Qualitative properties are the color and state of the sugar and the claim of greater density.

3. Compare and contrast a model with a theory.

Theories are broad generalizations used to explain observations. Models are a physical object used to illustrate or explain complex concepts or an explanation of how phenomena occur and how data and events are related.

Chemistry Review Questions and Answers Clyde G. Kern, 1923 **Complete Solutions and Answers for General Chemistry** John Mays, 2018-01-29 All answers to exercises quizzes and tests plus worked out solutions General Chemistry uses a mastery learning method In this method students build comprehension by adding new concepts while reviewing and rehearsing key material throughout the year This method is implemented in carefully crafted exercises quizzes and the textbook narrative and it facilitates learning mastery and retention Students appreciate the smaller profile and lighter weight of our books This is possible because of aspects of our Textbook Philosophy When mastery is the goal you must cull down the material to an amount that can reasonably be mastered in one year Related subjects are integrated into the narrative The history of modern chemistry mathematics and technical communication is emphasized throughout Integration protects a

course from seeming compartmentalized from other subjects That s certainly not how the real world is Real chemists use math and writing skills every day Their knowledge about how the scientific enterprise works is greatly enhanced by their knowledge of great scientists who came before Our approach to implementing a Kingdom Perspective does not entail unnaturally inserting Bible verses or devotional insets A better approach for Christians is to do science from the faith informed perspective of disciples of Christ studying God s created order This is apparent in General Chemistry from the observations about order in the universe in how nature submits to scientific study and modeling and in the fitness of creation as a habitat for humanity and animal life *Modern Chemistry* Holt Mcdougal,2010-04-27
