Example #3: Page # 103

Find the coordinates of the point that divides the join of $A(-6, 3)$ and $B(5, -2)$ in the ratio $2:3$.

(i) internally

(ii) externally

Sol

We use formula (for internally)

$$x = \frac{K_1 x_2 + K_2 x_1}{K_1 + K_2}, \quad y = \frac{K_1 y_2 + K_2 y_1}{K_1 + K_2}$$

$$A(-6, 3), \quad B(5, -2) \quad K_1 : K_2 = 2 : 3$$

$$x_1 = -6, \quad y_1 = 3, \quad x_2 = 5, \quad y_2 = -2, \quad K_1 = 2, \quad K_2 = 3$$

Let Required coordinate of point "P"

$$P(x, y) = \left(\frac{K_1 x_2 + K_2 x_1}{K_1 + K_2}, \frac{K_1 y_2 + K_2 y_1}{K_1 + K_2} \right)$$

$$x = ?$$

$$y = ?$$

$$x = \frac{K_1 x_2 + K_2 x_1}{K_1 + K_2}$$

$$x = \frac{(2)(5) + (3)(-6)}{2 + 3}$$

$$x = \frac{10 - 18}{5}$$

$$x = -\frac{8}{5}$$

$$y = \frac{K_1 y_2 + K_2 y_1}{K_1 + K_2}$$

$$y = \frac{(2)(-2) + (3)(3)}{2 + 3}$$

$$y = \frac{-4 + 9}{5}$$

$$y = \frac{5}{5}$$

$$y = 1$$

(ii) externally

We use formula

$$x = \frac{K_1 x_2 - K_2 x_1}{K_1 - K_2}, \quad y = \frac{K_1 y_2 - K_2 y_1}{K_1 - K_2}$$

$$x = \frac{(2)(5) - (3)(-6)}{2 - 3}, \quad y = \frac{(2)(-2) - (3)(3)}{2 - 3}$$

$$x = \frac{10 + 18}{-1}, \quad y = \frac{-4 - 9}{-1}$$

$$x = -\frac{28}{1}, \quad y = -\frac{13}{1}$$

$$x = -28, \quad y = 13$$

Ex #4.1

Q#1:- Describe the location in the plane of the point $P(x, y)$ for which

vii (i) $|x| = -|y|$

vii (ii) $|x| \geq 3$

ix (iii) $x > 2$ and $y = 2$

Sol $|x| = -|y|$

A positive value cannot equal to a negative value, except number zero, so location of point in the plane is at **origin**.

$$|x| \geq 3$$

$$\Rightarrow \pm x \geq 3$$

$$\Rightarrow +x \geq 3 \quad \text{or} \quad -x \geq 3$$

$$\Rightarrow x \geq 3 \quad \text{or} \quad x \leq -3$$

which is the set of points lying on right side of the line $x=3$ and the points lying on left side of the line $x=-3$

Essential Questions For Analytical Geometry:

Essential Questions Jay McTighe, Grant P. Wiggins, 2013 This book from the authors of *Understanding by Design* explores how to design and frame essential questions that prompt students to think deeply and create a more stimulating environment for learning

Linear Algebra and Analytic Geometry Bennie Marsh & Frankie Murray, 2018-01-18 In this book the topics are presented in the same order as in the textbook The problems concern two content areas Linear Algebra and Analytical Geometry After reading this book a student should be able to solve linear equations and to perform the basic operations on numbers and algebraic expressions The Linear Algebra tests will reveal readers knowledge and skills readers abilities in interpreting symbols justifying statements and constructing proofs Readers should be able to apply the properties of determinants and matrix operations and solve linear systems of equations The Analytical Geometry topics include different forms of equations of straight lines and planes angles between simple figures the curves of the second order This book will prove definitive and ideal reference tool to research scholars academicians and educationists

Basic Questions on Truth P. Weingartner, 2012-12-06 The task of the book is not to give a survey of the main theories on truth found in the literature There are several books available which do this The one of David for Deflationist and Disquotational Theories of Truth that of Chapuis for Revision Theories of Truth that of Kirkham for Correspondence Theories and several others that of Rescher for Coherence Theories of Truth Moreover the book is not an analysis just of Tarski's theory like that of Moreno or the respective chapters in Kirkham though Tarski's theory plays an important role in the whole work presented The task of the book is to give a detailed answer to some basic questions on truth which have been perennial problems through the centuries and are still discussed today The answer is given in the light of our knowledge today and with the help of modern logic But the book explicitly aims at connecting recent problems with related ones in the whole history of philosophy The method to incorporate important philosophers of the tradition into the analysis is that of disputation i.e. of putting some of their main thesis into objections or counterobjections pro or contra a positive answer to the respective question After the pros and cons are given a detailed answer to the question is proposed and finally commentaries and corrections are given to the objections and counterobjections in the light of the proposed answer

Analysis, Geometry, Number Theory: The Mathematics of Leon Ehrenpreis Eric Grinberg, 2000 This book presents the proceedings from the conference honoring the work of Leon Ehrenpreis Professor Ehrenpreis worked in many different areas of mathematics and found connections among all of them For example one can find his analytic ideas in the context of number theory geometric thinking within analysis transcendental number theory applied to partial differential equations and more The conference brought together the

communities of mathematicians working in the areas of interest to Professor Ehrenpreis and allowed them to share the research inspired by his work The collection of articles here presents current research on PDEs several complex variables analytic number theory integral geometry and tomography The work of Professor Ehrenpreis has contributed to basic definitions in these areas and has motivated a wealth of research results This volume offers a survey of the fundamental principles that unified the conference and influenced the mathematics of Leon Ehrenpreis *Now That's a Good Question!* Erik M. Francis,2016-07-22 In this book Erik M Francis explores how one of the most fundamental instructional strategies questioning can provide the proper scaffolding to deepen student thinking understanding and application of knowledge You ll learn Techniques for using questioning to extend and evaluate student learning experiences Eight different kinds of questions that challenge students to demonstrate higher order thinking and communicate depth of knowledge How to rephrase the performance objectives of college and career readiness standards into questions that engage and challenge students Francis offers myriad examples of good questions across content areas and grade levels as well as structures to help teachers create and use the different kinds of questions By using this book to fine tune your approach to questioning you can awaken the spirit of inquiry in your classroom and help students deepen their knowledge understanding and ability to communicate what they think and know The Essential Comte (RLE Social Theory) Stanislav Andreski,2014-08-21 Auguste Comte proclaimed himself the founder of sociology and on the whole this claim is accepted His most important work is the six volume Cours de Philosophie Positive of which this present book is a selective abridgement Comte as this selection shows was a methodological visionary He was an eminently successful terminological innovator and to him we owe not only sociology and positivism but also biology and altruism Professor Andreski in his lucid introduction assesses Comte s place under six headings as scientist philosopher sociological theorist sociological historian reformer and methodologist But this selection from Comte s works will be most welcomed because it provides a modern English translation of the main body of his thought **GMAT For Dummies 2020** Lisa Zimmer Hatch,Scott A. Calculus and Analytic Geometry Donald W. Trim, 1983 **History of Mathematics** Craig Smorynski, 2007-12-03 1
An Initial Assignment I haven't taught the history of mathematics that often but I do rather like the course The chief drawbacks to teaching it are that i it is a lot more work than teaching a regular mathematics course and ii in American colleges at least the students taking the course are not mathematics majors but education majors and in the past I had found education majors to be somewhat weak and unmotivated The last time I taught the course however the majority of the students were graduate education students working toward their master's degrees I decided to challenge them right from the start 1 Assignment In An Outline of Set Theory James Henle wrote about mathematics Every now and then it must pause to organize and reflect on what it is and where it comes from This happened in the sixth century B C when Euclid thought he had derived most of the mathematical results known at the time from five postulates Do a little research to find as many errors as possible in the second sentence and write a short essay on them The responses far exceeded my expectations To be sure some of the undergraduates found the assignment unclear I did not say how many errors they were supposed to find But many of the students put their hearts and souls 1 My apology to Prof Henle
at whose expense I previously had a little fun on this matter I used it again not because of any animosity I hold for him but because I was familiar with it and dealing with Euclid it seemed appropriate for the start of my course The United States Catalog, 1924 *GMAT For Dummies* Scott A. NASA Tech Briefs ,1996 *Epistemological Writings* H. von Helmholtz,2012-12-06 1977

Hermann von Helmholtz in the History of Scientific Method In 1921 the centenary of Helmholtz birth Paul Hertz a physicist and Moritz Schlick a philosopher published a selection of his papers and lectures on the philosophical foundations of the sciences under the title *Schriften zur Erkenntnistheorie* Combining qualities of respect and criticism that Helmholtz would have demanded Hertz and Schlick scrupulously annotated the texts Their edition of Helmholtz was of historical influence comparable to the influence among contemporary mathematicians and philosophers of Hermann Weyl s annotated edition in 1919 of Riemann s great dissertation of 1854 on the foundations of geometry For several reasons we are pleased to be able to bring this Schlick Hertz edition to the English reading world first and primary to honor the memory of Hermann von Helmholtz second as writings of historical value to deepen the understanding of mathematics and the natural sciences as well as of psychology and philosophy in the 19th centur for Helmholtz must be comprehended within at least that wide a range third with Schlick to understand the developing empiricist philosophy of science in the early 20th century and fourth to bring the contributions of Schlick Hertz and Helmholtz to methodological debate in our own time a half century later long after the rise and consolidation of logical empiricism the explosion of physics since Planck and Einstein and the development of psychology since Freud and Pavlov
