Reluctant Cold Warriors Vladimir Kontorovich, 2019-09-02 Scholars attribute the collapse of the Soviet Union in part to the militarization of its economy But during the Cold War economic studies of the USSR largely neglected the military sector of the Soviet economy its dominant and most successful part This is all the more puzzling in that academic study of the Soviet economy in the US was specifically created to help fight the Cold War If the rival superpower maintained the peacetime war economy why did experts fail to tell us when it mattered Vladimir Kontorovich shows how Western economists came up with strained non military interpretations of several important aspects of the Soviet economy which the Soviets themselves acknowledged to have military significance Such civilianization suggests that the neglect of the military sector was not forced on scholars of the Soviet economy by secrecy it was their choice The explanation of this choice in *Reluctant Cold Warriors* raises many questions about the internal workings of economic Sovietology and its intellectual and political background Are peripheral academic fields mimicking the agenda of the discipline s mainstream more likely to produce faulty scholarship Did the search for the essence of socialism distract researchers from the actual Soviet economy Were economic Sovietologists under political pressure and if so in what direction This book answers these questions in a way that has broad relevance for national security uses of social science today

The Vocation of Business John C. Médaille, 2007-05-25 This is a textbook on the Social Teaching of the Roman Catholic Church for would be business professionals Part I does 3 things provides 1 a history of moral discourse since the Enlightenment 2 a history of economic thought from Aristotle and Aquinas to Ludwig Mises and Milton Friedman and 3 a history of property Part II provides a close reading of 3 major social encyclicals Part III examines the tensions between Catholic social teaching and neoclassical economics Part IV explores 5 case studies of the actual implementation of Catholic like social teaching The over riding theme of the book is that the original unity of distributive and corrective justice that prevailed in both economics and moral discourse until the 16th and 17th centuries was shattered by the rise of an individualistic capitalism that relied on corrective justice justice in exchange only The rise of individualistic business practice was paralleled by a movement in moral thinking from a discourse of virtue and the common good to a discourse of utilitarianism and emotivism individual preference became all that mattered and only the market is capable of correlating individual preferences An economics that lacks a distributive principle will attain neither equity nor equilibrium and will be inherently unstable and increasingly reliant on government power Keynesianism to correct the

balances Catholic social teaching emphasizes equity in the distribution of land the means of production and a just wage
