spectrum of localities and actors Making Public in a Privatized World uncovers the radically different ways in which public services are being reshaped from the grassroots up From communities holding the state accountable for public health in rural Guatemala to waste pickers in India and decentralized solar electricity initiatives in Africa the essays in this collection offer probing insights into the complex ways in which people are building genuine alternatives to privatization while also illustrating the challenges which communities face in creating public services which are not subordinated to the logic of the market or to the monolithic state entities of the past

The Post-Election Violence in Kenya Sosteness Francis Materu, 2014-12-04 Since the historic Nuremberg Trial of 1945 an international customary law principle has developed that commission of a core crime under international law war crimes genocide crimes against humanity and aggression should not go unpunished

History shows that when in Africa such violations occurred especially as a result of election disputes national and regional actors including the African Union resorted to political rather than legal responses However when crimes against humanity were alleged to have been committed in Kenya during the 2007 2008 post election violence a promising road map for criminal accountability was agreed upon alongside a political solution In the spirit of this road map the author analyzes the post election violence in Kenya from a legal point of view He extensively examines legal options for domestic criminal accountability and discusses both retributive prosecutions and restorative justice mainly truth commission mechanisms being the main legal responses to the gross violations of human rights Furthermore he thoroughly investigates the Kenya situation before the ICC and the legal cum political responses to the ICC intervention in Kenya Practitioners and academics in the field of international criminal law and related disciplines as well as political sciences and legal history will find in this book highly relevant information about alternative legal approaches of the fight against and punishment of crimes against humanity as defined under the ICC Statute

The African National Congress and the Regeneration of Political Power Susan Booysen,2011-11-11 The African National Congress is light years beyond the liberation movement of old It remains a juggernaut but its control and dominance are no longer watertight The ANC lives the contradictions of weaknesses cracks and factions while retaining its colossal status As a party movement it draws on its liberation credentials and extracts immense power from its deep anchorage in South Africa's people It is immersed in electoral politics that marks the state of its overwhelming power cyclically As government the ANC is the object of protest but not protest designed to bring the ruling party to its knees The ANC is in command of the state yet fails to definitively counter the deficits that make South Africa's democracy seem so diluted Its incredulous and thus far trusting supporters condemn but only rarely punish deployees who do not pass through the eye of the needle The ANC and the Regeneration of Political Power unpacks these contradictions It focuses on four faces of the ANC's political power the organisation the people political parties and elections and policy and government and explores how the ANC has acted since 1994 to continuously regenerate its power By 2011 12 the power configurations around the ANC were converging to a conjuncture holding vexing uncertainties This book presents insights

into how South African politics in many ways synonymous with the politics of the ANC is likely to unfold in years and possibly decades to come

Development In Modern Africa Martin S. Shanguhya, Toyin Falola, 2019-10-08 Development in Modern Africa Past and Present Perspectives contributes to our understanding of Africa's experiences with the development process. It does so by adopting a historical and contemporary analysis of this experience. The book is set within the context of critiques on development in Africa that have yielded two general categories of analysis: skepticism and pessimism. While not overlooking the shortcomings of development, the themes in the book express an optimistic view of Africa's development experiences, highlighting elements that can be tapped into to enhance the condition of African populations and their states. By using case studies from precolonial, colonial, and postcolonial Africa, contributors to the volume demonstrate that human instincts to improve material, social, and spiritual worlds are universal. They are not limited to the Western world, which the term and process of development are typically associated with. Before and after contact with the West, Africans have actively created institutions and values that they have actively employed to improve individual and community lives. This innovative spirit has motivated Africans to integrate or experiment with new values and structures, challenges, and solutions to human welfare that resulted from contact with colonialism and the postcolonial global community. The book will be of interest to academics in the fields of history, African studies, and regional studies.

International Law Carlo Focarelli, 2019 International Law provides a comprehensive theoretical examination of the key areas of international law. Urbanization and Industrialization for Africa's Transformation, 2017 The 2017 Economic Report on Africa focuses on the linkages between industrialization and urbanization. Urbanization is one of Africa's mega trends with profound implications for the social, economic, environmental dimensions of growth and transformation. Theory and experience demonstrate that industrialization and urbanization can be mutually reinforcing processes. It is therefore imperative to explore the linkages between urbanization and industrialization given the profound implications for structural transformation in Africa. So far, current policy narratives and frameworks on structural transformation and industrialization in Africa have largely failed to factor in the spatial and urban dimensions of industrialization and, in particular, the advantages presented by productivity enhancement and agglomeration effects generated by cities. Yet the nexus between urbanization and industrialization is of particular relevance for Agenda 2063 and the 2030 Agenda on Sustainable Development. Both agendas recognize urbanization as a critical factor for sustainable development. It is also important to consider urbanization and industrialization in light of Africa's engagement with the Third United Nations Conference on Housing and Sustainable Urban Development, Habitat III, to be held in Quito, Ecuador, in October 2016. In this context, African policy makers have clearly recognized urbanization as an engine of structural transformation for inclusive and sustainable growth.
