The 1990s have seen a rapid development of computer-aided design (CAD) systems, which have revolutionized the design process. CAD systems allow designers to create 3D models of their designs, which can be used to visualize the design and to perform simulations. CAD systems also allow designers to create detailed drawings of their designs, which can be used for manufacturing. CAD systems have also been used to create virtual reality environments, which can be used to simulate the design process.
