Honeywell

Automatic SIA 3 with text enriched messages

All alarms generated by the Alarm System are automatically sent to the AMS using SIA. SIA messages provide a full audit trail of an event – which detector, location, time and date, and a permanent record of every alarm. Messages for set and unset include who, where, time, and date, all recorded. No need to check that each PIN is correctly wired, the Galaxy and the WebWay take care of everything automatically.

Pre Installation

Galaxy Flex

Please check the following table to evaluate the connectivity for your Galaxy Panel and WebWay SPT. Should you have any queries please contact WebWayOne Support on 01635 231514 or support@webwayone.co.uk who will be happy to assist.

Integration	Functionality	Considerations
RS485	Full SIA alarms Remote Upload/Download Remote Servicing (Automated) Line Fault Monitoring driven by the Galaxy settings	An SPT re-boot will generate a Missing Com + Key alarm – manager/engineer reset to clear. This is due to the Galaxy serial bus being monitored 5 times a second.
RS232	Full SIA alarms Remote Upload/Download WebWay Remote Maintenance will not cause disruption when the SPT reboots	Outputs are required to indicate Line Fault (Relay required). Only G3 and Dimension panels have an internal 232 module by default. Automated Remote servicing is not possible
