

TRAILER WIRING EXPLAINED

BY Rick Peave

PHOTOGRAPHY

CHRIS L. ANDERSON/ISTOCK

Seems like every time we loan out our trailer it comes back with the lights not working and we end up having to rewire the whole thing. It's not that we did it wrong the first time, but with the multitude of different plugs, adapters, and tow rigs, a lot of custom jiggering of the wires always occurs.

You've probably done it yourself—connect some wires into the trailer plug, attempt to figure out where they go on the vehicle, and hope you don't short out and burn them both down. Well,

guess what? There is a standard way to wire plugs and trailers, and almost every adapter is made to hook nearly any combo together!

It's the law. You need to have lights on your flat-towed rig or trailer, and it's simply unsafe not to comply, or have only half of them working. Wiring a trailer incorrectly means you may flash a left turn signal in

the truck while the trailer indicates a right turn, which could have disastrous results. Check out our diagrams and products we've selected so you can do a proper wiring job. It may save you a ticket, or your life.
