One of the most reviewed items on the Herd Summary is the rolling herd average. However, this number is slow to change and is not the quickest indicator for evaluating herd management. Management Level Milk (MLM) and test day milk pounds, also located in Block E, as well as your herd's Transition Cow Index™ identify trends in herd production sooner than rolling herd averages. For more information to more effectively utilize your DHI reports, contact your Field Technician or call (800) 238-0097.
