**The ICT Teacher's Handbook** Roger Crawford, 2013-06-26 The ICT Teacher's Handbook is an indispensable guide for all teachers responsible for the teaching and management of ICT in the secondary school both as a comprehensive introduction for students learning to teach ICT and as a source of ongoing support for busy practising teachers. Illustrated throughout with case studies, key further reading and guidance on where to find and how to choose the best software and resources, the book also features a guide to specifications software for whole school support and a useful glossary of key terms. Key topics covered include: Organising and delivering the ICT National Curriculum at key stages 3 and 4 and post 16; Teaching and learning with VLEs, IWBs, social networking and mobile technologies; Assessment, record keeping and reporting; Popular hardware, software and networks; External assessment, target setting and tracking; Managing technical support and technicians; Preparing for promotion and managing an ICT department; Strategies for whole school management of ICT. Written for trainee and experienced ICT teachers and managers in both English and international schools, The ICT Teacher's Handbook is an authoritative guide designed to support effective teaching and learning and efficient use of technology in all schools. *Educating Tomorrow's Engineers* Great Britain: Parliament: House of Commons: Science and Technology Committee, 2013-02-08 In the UK we teach young people to become computer users and consumers rather than programmers and software engineers. This is creating a chronic skills gap in ICT. We need around 82 000 engineers and technicians just to deal with retirements up to 2016 and 830 000 SET professionals by 2020. On the plus side, the Government's proposal to include computer science as a fourth science option to count towards the EBac is welcomed. The Committee also welcomes the EBac's focus on attainment of mathematics and science GCSEs but is concerned that subjects such as Design and Technology, D.T. might be marginalised. A Technical Baccalaureate, TechBac, is being designed but if it is to be a success, schools should be incentivised to focus on the TechBac by making it equivalent to the EBac. Reforms to vocational education following the Wolf Review meant that Level 2 of the Engineering Diploma, a qualification highly regarded, would count as equivalent to one GCSE despite requiring curriculum time and effort equivalent to several GCSEs. The Engineering Diploma, however, is currently being redesigned as four separate qualifications. The Committee also expressed concerns over the Department for Education's (DfE) lack of clarity on its research budget and use of evidence in decision making. The DfE needs to place greater focus on gathering evidence before changes to qualifications are made and must leave sufficient time for evidence to be gathered on the effectiveness of policies before introducing further change. The possibility of gathering evidence from randomised controlled trials (RCTs) should be seriously considered. **Edexcel IGCSE Mathematics A**, 2009
