## Joint Exam For Civics:

Civic Affairs ,1965      *Civic Education in the Asia-Pacific Region* John L. Cogan,Murray Print,2013-12-02 This book examines the approach to civic education in six societies located on the Pacific Rim Australia Japan Hong Kong Taiwan Thailand and the US In these scrupulously designed studies the contributors investigate the recent re emergence of civic education in this region Developments such as globalization nationalism and sovereignty have profound effects on how schools make good citizens These essays reveal how definitions of citizenship are contested and revised under such influences and interrogate differences in civic education from nation to nation As societies attempt to strike a balance between obedience and critical thinking schools become the primary site of these transformations Analyzing both educational policy and its implementation these contributors offer a groundbreaking comparative study that grounds civic education historically and politically      For the Civic Good Walter Feinberg,Richard A. Layton,2014-01-28 A case for teaching classes on world religion and the Bible in public schools      **Civic Medicine** J. Andrew Mendelsohn,Annemarie Kinzelbach,Ruth Schilling,2019-07-30 Communities great and small across Europe for eight centuries have contracted with doctors Physicians provided citizen care helped govern and often led in public life Civic Medicine stakes out this timely subject by focusing on its golden age when cities rivaled territorial states in local and global Europe and when civic doctors were central to the rise of shared organized written information about the human and natural world This opens the prospect of a long history of knowledge and action shaped more by community and responsibility than market or state exchange or power      **English Literacy and Civics Education for Adult Learners** Michelle Tolbert,2001      *Globalizing Civic Engagement* John D Clark,2012-03-29 Informative and useful Development and Change Until recently most civil society organizations CSOs operated at national or local levels However new global organizations and networks are increasingly emerging This book examines what CSOs can achieve and the barriers they face when they break national boundaries and sectoral moulds and work with others in global networks A series of case studies of CSO initiatives reveal how transnational action can yield impressive results in changing policies and public attitudes The diverse range of CSOs studied includes consumer groups trade unions the anti globalization protest movement the World Social Forum Jubilee 2000 and others All reveal a remarkably similar array of practical challenges from structure and leadership issues to governance dilemmas The book offers practical guidance to those engaged with CSOs and contributes to academic enquiry about civil society      *Civic Service* James L. Perry,Ann Marie Thomson,2015-04-08 The concept and practice of civic service is deeply rooted in America s past present and future and has been a featured component of recent presidential agendas Yet despite ongoing debates about the methods and values of civic service no recent book has systematically analyzed the effectiveness and outcomes of service programs in America Civic Service What Difference Does It Make presents a thorough research based evaluation of public service programs in the United States Divided into four key parts this groundbreaking volume presents original information

Niemi,Jane Junn,2005-05-11 Sound democratic decisions rely on a citizenry with at least a partial mastery of the rules and workings of democratic government American high schools where students learn the basics of citizenship thus ought to play a critical role in the success of democracy Yet studies examining the impact of high school government and civics courses on political knowledge over the past quarter century have generally shown that these courses have little or no effect In this important book Richard G Niemi and Jane Junn take a fresh look at what America s high school seniors know about government and politics and how they learn it The authors argue convincingly that secondary school civics courses do indeed enhance students civic knowledge This book is based on the most extensive assessment to date of civic knowledge among American youth the 1988 National Assessment of Education Progress NAEP Civics Assessment The authors develop and test a theoretical model to explain the cognitive process by which students learn about politics and they conclude by suggesting specific changes in the style and emphasis of civics teaching
