Jsc Question 2014:

The Oxford Handbook of Comparative Environmental Law Emma Lees, Jorge E. Viñuales, 2019-05-06 This Handbook is the first comprehensive account of comparative environmental law. It examines in detail the methodological foundations of the discipline as well as the substance of environmental law across countries from four vantage points: country studies from all continents; responses to common problems including air pollution, water management, nature conservation, genetically modified organisms, climate change, and energy; chemicals waste; foundational components of environmental law systems including principles, property rights, administrative and judicial organisation, command and control, regulation, market mechanisms, informational techniques, and liability mechanisms; and common interactions of environmental protection with the broader public, private, and criminal law contexts. The volume brings together the foremost authorities in this field from around the world to provide a concise, self-contained, and technically rigorous account of environmental law as a single overall system. *NASA's Human Space Exploration* United States. Gender and the Judiciary in Africa Gretchen Bauer, Josephine Dawuni, 2015-10-30 Between 2000 and 2015, women ascended to the top of judiciaries across Africa, most notably as chief justices of supreme courts in common law countries like Ghana, Nigeria, Sierra Leone, Gambia, Malawi, Lesotho, and Zambia, but also as presidents of constitutional courts in civil law countries such as Benin, Burundi, Gabon, Niger, and Senegal. Most of these appointments was a first in terms of the gender of the chief justice. At the same time, women are being appointed in record numbers as magistrates, judges, and justices across the continent. While women's increasing numbers and roles in African executives and legislatures have been addressed in a burgeoning scholarly literature, very little work has focused on women in judiciaries. This book addresses the important issue of the increasing numbers and varied roles of women judges and justices as judiciaries evolve across the continent. Scholars of law, gender politics, and African politics provide overviews of recent developments in gender and the judiciary in nine African countries that represent north-east, southern, and west Africa, as well as a range of colonial experiences, postcolonial trajectories, and legal systems including mixes of common, civil, customary, or sharia law. In the process, each chapter seeks to address the following questions: What has been the historical experience of the judicial system in a given country from before colonialism until the present? What is the current court structure, and where are the women judges, justices, magistrates, and other women located? What are the selection or appointment processes for joining the bench, and in what ways may these help or hinder women to gain access to the courts as judges and justices? Once they become judges, do women on the bench promote the rights of women through their judicial powers? What are the challenges and obstacles facing women judges and justices in Africa? Timely and relevant in this era in which governmental accountability and transparency are essential to the consolidation of democracy in Africa, and when women are accessing significant leadership positions across the continent, this book considers the substantive and

symbolic representation of women's interests by women judges and the wider implications of their presence for changing institutional norms and advancing the rule of law and human rights *Gender, Judging and the Courts in Africa* J. Jarpa Dawuni, 2021-11-29 Women judges are playing increasingly prominent roles in many African judiciaries yet there remains very little comparative research on the subject Drawing on extensive cross national data and theoretical and empirical analysis this book provides a timely and broad ranging assessment of gender and judging in African judiciaries Employing different theoretical approaches the book investigates how women have fared within domestic African judiciaries as both actors and litigants It explores how women negotiate multiple hierarchies to access the judiciary and how gender related issues are handled in courts The chapters in the book provide policy theoretical and practical prescriptions to the challenges identified and offer recommendations for the future directions of gender and judging in the post COVID 19 era including the role of technology artificial intelligence social media and institutional transformations that can help promote women's rights Bringing together specific cases from Kenya Uganda Ghana Nigeria Zambia Tanzania and South Africa and regional bodies such as ECOWAS and the African Commission on Human and Peoples Rights and covering a broad range of thematic reflections this book will be of interest to scholars students and practitioners of African law judicial politics judicial training and gender studies It will also be useful to bilateral and multilateral donor institutions financing gender sensitive judicial reform programs particularly in Africa The Open Access version of this book available at www.taylorfrancis.com/books/oa-edit/10.4324/9780429327865/gender-judging-courts-africa-jarpa-dawuni has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
