

MARK SCHEME for the May/June 2013 series

0653 COMBINED SCIENCE

0653/22

Paper 2 (Core Theory), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

through the lens of current social economic and policy aspects this four volume reference work explores the topic of transportation across multiple disciplines within the social sciences and related areas including geography public policy business and economics The book s articles all written by experts in the field seek to answer such questions as What has

been the legacy not just economically but politically and socially as well of President Eisenhower's modern interstate highway system in America. With that system and the infrastructure that supports it now in a state of decline and decay what is the best path for the future at a time of enormous fiscal constraints? Should California politicians plunge ahead with plans for a high speed rail that every expert says despite the allure will go largely unused and will never pay back the massive investment while at this very moment potholes go unfilled all across the state? What path is best for emerging countries to keep pace with dramatic economic growth for their part? What are the social and financial costs of gridlock in our cities? Features Approximately 675 signed articles authored by prominent scholars are arranged in A to Z fashion and conclude with Further Readings and cross references. A Chronology helps readers put individual events into historical context. A Reader's Guide organizes entries by broad topical or thematic areas. A detailed index helps users quickly locate entries of most immediate interest and a Resource Guide provides a list of journals, books and associations and their websites. While articles were written to avoid jargon as much as possible, a Glossary provides quick definitions of technical terms. To ensure full well rounded coverage of the field, the General Editor with expertise in urban planning, public policy and the environment worked alongside a Consulting Editor with a background in Civil Engineering. The index, Reader's Guide and cross references combine for thorough search and browse capabilities in the electronic edition. Available in both print and electronic formats. Encyclopedia of Transportation is an ideal reference for libraries and those who want to explore the issues that surround transportation in the United States and around the world.

A STUDY OF WOMEN WORKERS IN ERI SILK HANDLOOM INDUSTRY IN RI-BHOI DISTRICT OF MEGHALAYA DONNA RICA DIENGDOH, **Ships and Offshore Structures XIX** Carlos Guedes Soares, Y. Garbatov, 2015-09-03 This three volume work presents the proceedings from the 19th International Ship and Offshore Structures Congress held in Cascais Portugal on 7th to 10th September 2015. The International Ship and Offshore Structures Congress (ISSC) is a forum for the exchange of information by experts undertaking and applying marine structural research. The aim of **The People's Money** Paola Subacchi, 2016-11-22 Many of the world's major economies boast dominant international currencies. Not so for China. Its renminbi has lagged far behind the pound, the euro and the dollar in global circulation and for good reason. China has long privileged economic policies that have fueled development at the expense of the renminbi's growth and it has become clear that the underpowered currency is threatening China's future. The nation's leaders now face the daunting task of strengthening the currency without losing control of the nation's economy or risking total collapse. How are they approaching this challenge? In *The People's Money* Paola Subacchi introduces readers to China's monetary system, mapping its evolution over the past century and particularly its transformation since Deng Xiaoping took power in 1978. Subacchi revisits the policies that fostered the country's economic rise while at the same time purposefully creating a currency of little use beyond China's borders. She shows the key to understanding China's economic predicament lies in past and future strategies for the renminbi. The financial turbulence

following the global crisis of 2008 coupled with China's ambitions as a global creditor and chief economic power has forced the nation to reckon with the limited international circulation of the renminbi. Increasing the currency's reach will play a major role in securing China's future. *Free Speech after 9/11* Katharine Gelber, 2016-04-14 Although there has been a lot written about how counter terrorism laws impact on human rights and civil liberties most of this work has focussed on the most obvious or egregious kinds of human rights abrogation such as extended detention torture and extraordinary rendition. Far less has been written about the complex ways in which Western governments have placed new and far reaching limitations on freedom of speech in this context since 9/11. This book compares three liberal democracies the United States the United Kingdom and Australia in particular showing the commonalities and similarities in what has occurred in each country and the changes in the appropriate parameters of freedom of speech in the counter terrorism context since 9/11 achieved both in policy change and the justification for that change. In all three countries much speech has been criminalized in ways that were considered anachronistic or inappropriate in comparable policy areas prior to 9/11. This is particularly interesting because other works have suggested that the United States unique protection of freedom of speech in the First Amendment has prevented speech being limited in that country in ways that have been pursued in others. This book shows that this kind of argument misses the detail of the policy change that has occurred and privileges a textual reading over a more comprehensive policy based understanding of the changes that have occurred. The author argues that we are now living a new normal for freedom of speech within which restrictions on speech that once would have been considered aberrant overreaching and impermissible are now considered ordinary necessary and justified as long as they occur in the counter terrorism context. This change is persistent and it has far reaching implications for the future of this foundational freedom.

Towards Low Carbon Cities in China Sun Sheng Han, Ray Green, Mark Wang, 2014-09-19 This book explores the relationship between urban form and greenhouse gas emissions in China providing new insights for policy urban planning and management. Drawing on the results of a four year multidisciplinary research project the book examines how factors such as urban households access to services and jobs land use mixes and provision of public transport impact on greenhouse gas emissions. The authors analyse data from a wide range of sources including 4677 sample households from four major Chinese cities Beijing Shanghai Wuhan and Xi'an with diverse locations urban spatial structures and population sizes. The book explores residents attitudes to reducing GHG emissions and advances knowledge relating to three environmental scales cross metropolitan intra city and neighbourhood level. It also contributes to debates on low carbon policy by revealing the relevance of urban planning parameters at both the macro and micro levels. The book will be of interest to scholars in the areas of urban planning urban management environmental sustainability and resource utilisation as well as urban policy makers and planners who are working toward developing low carbon sustainable cities of the future. *Bringing the English Curriculum to Life* David Didau, 2024-04-12 *Bringing the English Curriculum to Life* builds on David Didau's groundbreaking
