## Identification and Characterization of Cellulase Producing Fungi.

*Hymenula cerealis*, *Neottiosporella radiata*, *Sphaerosporium lignatile*, and *Monilochaetes infuscans* were isolated from soil of Botanical Garden, Obafemi Awolowo University, Ile-Ife. The soil sample was serially diluted and isolation was done using pour plate method. The organisms were then screened for cellulase production using carboxymethyl cellulase and Congo red. The screening result showed that *Hymenula cerealis*, *Neottiosporella radiata*, and *Sphaerosporium lignatile* are capabl...

## Preliminary Investigation of the Possible Pathogenic Bacterial Contents of Some Local Non-Alcoholic Drinks

The aim of this study was to determine the safety profiles of some local non-alcoholic drinks sold within Zaria locality by isolating and characterizing the possible pathogenic bacteria found in them. For this aim, 17 samples of Zobo drink, 19 samples of Kunu zaki drink, and 15 samples of Ginger drink were analysed. Among the 51 total samples, *Klebsiella pneumoniae* was isolated from one Ginger drink sample; *Serratia marcescens* was isolated from two Zobo drink samples and two Ginger drink sa...

#### Detection of Pathogens in Water Using Micro and Nano-Technology Giampaolo Zuccheri,Nikolaos Asproulis,2012-08-14

Detection of Pathogens in Water Using Micro and Nano Technology aims to promote the uptake of innovative micro and nano technological approaches towards the development of an integrated cost effective nano biological sensor useful for security and environmental assays The book describes the concerted efforts of a large European research project and the achievements of additional leading research groups The reported knowledge and expertise should support in the innovation and integration of often separated unitary processes Sampling cell lysis and DNA RNA extraction DNA hybridisation detection micro and nanosensors microfluidics together also with computational modelling and risk assessment can be integrated in the framework of the current and evolving European regulations and needs The development and uptake of molecular methods is revolutionizing the field of waterborne pathogens detection commonly performed with time consuming cultural methods The molecular detection methods are enabling the development of integrated instruments based on biosensor that will ultimately automate the full pathway of the microbiological analysis of water Editors Giampaolo Zuccheri University of Bologna Italy and Nikolaos Asproulis Cranfield University UK Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations for 1999 United States. microbial genetics This chapter lays the groundwork for understanding the central dogma of biology and the role microbes play in genetic studies From here Chapter 2 delves into the molecular basis of life exploring the chemical and structural foundation of macromolecules like DNA RNA and proteins Subsequent chapters focus on more specialized topics Chapter 3 discusses the genomics of microbes providing insights into genome structure sequencing technologies and comparative genomics Chapter 4 examines DNA replication repair and recombination emphasizing the precision and adaptability of microbial genetic systems Chapter 5 shifts focus to the regulation of gene expression in microbes elucidating the intricate networks that allow organisms to adapt to changing environments Chapter 6 which covers plasmids transposons and other agents of genetic exchange Following this Chapter 7 delves into the processes of bacterial conjugation transformation and transduction mechanisms that underpin horizontal gene transfer and drive microbial evolution Recognizing the practical side of the discipline Chapter 8 presents modern molecular techniques in microbial genetics including CRISPR RNA interference and high throughput sequencing These tools have revolutionized our ability to manipulate and study microbial genomes Chapter 9 ties microbial metabolism with genetics bridging cellular function and genetic regulation The penultimate chapter Chapter 10 highlights the applications of microbial genetics in medicine and biotechnology This includes the development of antibiotics vaccines and genetically engineered microbes for industrial processes Finally Chapter 11 offers a glimpse into the future discussing emerging trends like synthetic biology microbiome engineering and the challenges posed by antibiotic resistance

*Teaching and Learning Through Inquiry* Virginia S. Lee, 2023-07-03 Inquiry guided learning IGL refers to an array of classroom practices that promote student learning through guided and increasingly independent investigation of complex questions and problems Rather than teaching the results of others investigations which students learn passively instructors assist students in mastering and learning through the process of active investigation itself IGL develops critical thinking independent inquiry students responsibility for their own learning and intellectual growth and maturity The 1999 Boyer Commission Report emphasized the importance of establishing a firm grounding in inquiry based learning and communication of information and ideas While this approach capitalizes on one of the key strengths of research universities the expertise of its faculty in research it is one that can be fruitfully adopted throughout higher education North Carolina State University is at the forefront of the development and implementation of IGL both at the course level and as part of a successful faculty led process of reform of undergraduate education in a complex research institution This book documents and explores NCSU s IGL initiative from a variety of perspectives how faculty arrived at their current understanding of inquiry guided learning and how they have interpreted it at various levels the individual course the major the college the university wide program and the undergraduate curriculum as a whole The contributors show how IGL has been dovetailed with other complementary efforts and programs and how they have assessed its impact The book is divided into four parts the first briefly summarizing the history of the initiative Part Two the largest section describes how various instructors

departments and colleges in a range of disciplines have interpreted inquiry guided learning It provides examples from disciplines as varied as ecology engineering foreign language learning history music microbiology physics and psychology It also outlines the potential for even broader dissemination of inquiry guided learning in the undergraduate curriculum as a whole Part Three describes two inquiry guided learning programs for first year students and the interesting ways in which NCSU s university wide writing and speaking program and growing service learning program support inquiry guided learning Part Four documents how the institution has supported instructors and how they have supported themselves as well as the methods used to assess the impact of inquiry guided learning on students faculty and the institution as a whole The book has been written with three audiences in mind instructors who want to use inquiry guided learning in their classrooms faculty developers considering supporting comparable efforts on their campuses and administrators interested in managing similar undergraduate reform efforts It will also appeal to instructors of courses in the administration of higher education who are looking for relevant case studies of reform While this is a model successfully implemented at a research university it is one that is relevant for all institutions of higher education
