**Inequality, Class, and Economics** Eric Schutz, 2022-01-24 What if neoclassical economics addressed the question of class This accessible overview of economic theory launches this investigation The COVID 19 pandemic exposed the economic inequalities pervading every aspect of society and then multiplied them to a staggering degree A mere nine months into the lockdown the net worth of the infamous Forbes 400 increased by one trillion dollars In a single year the US poverty rate rose by the largest amount ever since record keeping began sixty years ago At the same time mass unemployment imperiled or erased the fragile right to quality health care for a substantial number of people living in states without Medicaid In *Inequality Class and Economics* Eric Schutz illumines the pillars undergirding the monstrous polarities which define our times and reveals them as the very same structures of power at the foundations of the class system under today s capitalism Employing both traditional and novel approaches to public policy *Inequality Class and Economics* offers prescriptions that can genuinely address the steepening and hardening of class boundaries This book pushes past economists studied avoidance of the problem of class as a system of inequality based in unequal opportunity and exhorts us to tackle the heart of the problem at long last [Studies in Economics and Political Science](#) Various, 2022-07-30 This 13 volume collection originally published between 1929 and 1982 contains a selection of titles from the fields of economics and political science Many individual titles focus on Britain and include topics such as democracy environmental planning foreign policy legislation microeconomics national income and the welfare state The earliest title looks at the nature of nationality and two further titles look at politics in France This set will be an insight for those interested in the history of either field

*Ecosystem-Based Management, Ecosystem Services and Aquatic Biodiversity* Timothy G. O'Higgins, 2020 Aquatic ecosystems are rich in biodiversity and home to a diverse array of species and habitats providing a wide variety of benefits to human beings Many of these valuable ecosystems are at risk of being irreversibly damaged by human activities and pressures including pollution contamination invasive species overfishing and climate change Such pressures threaten the

sustainability of these ecosystems their provision of ecosystem services and ultimately human well being Ecosystem based management EBM is now widely considered the most promising paradigm for balancing sustainable development and biodiversity protection and various international strategies and conventions have championed the EBM cause and the inclusion of ecosystem services in decision making This open access book introduces the essential concepts and principles required to implement ecosystem based management detailing tools and techniques and describing the application of these concepts and tools to a broad range of aquatic ecosystems from the shores of Lough Erne in Northern Ireland to the estuaries of the US Pacific Northwest and the tropical Mekong Delta     Applied Microeconomics Stephen Hope,1999-07-23
