

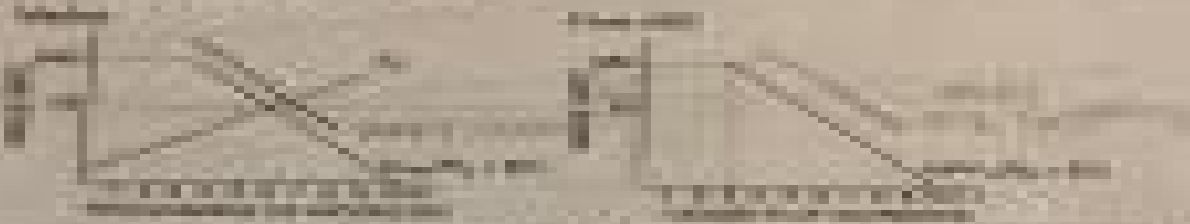

Figure 10.1 illustrates the effects of a decrease in the price of a factor of production on the production of two goods. The initial equilibrium is at the intersection of the initial budget line and the initial indifference curve. A decrease in the price of a factor of production rotates the budget line outward, leading to a new equilibrium at the intersection of the new budget line and the new indifference curve. The new equilibrium is at a higher level of utility and a higher level of output for both goods.
