It includes the Linear and Goal programming model for non pregnant dairy buffalo is been solved using Hybrid Real Coded Genetic Algorithm and the results are compared with Real Coded Genetic Algorithm RGA considering different versions like RGA without crossover RGA without Mutation RGA with crossover and mutation. These models can also be applied with other nutritional models like CNCPS INRA. This book is a step forward in that direction to provide least cost diet formulation based on nutrient requirement of the cattle and buffalo which is been calculated according to Indian Council of Agricultural Research ICAR 2013 and NRC 2001 on dry matter basis provides a clear and precise platform for other researcher in Animal Nutrition field which also give initial platform to build a software and android application to formulate least cost ration Based on data and algorithm used in this book which helps Dairy farmers directly to feed balanced diet at cheap rate. Features It is a good reference to local dairy farmers by introducing them to the right frequency and right amount of balanced diet to be fed to cattle and buffaloes at different production cycles. It will provide basic platform and some solutions to built up software about cattle nutrition development and least cost formulation for end user.
