Measuring Monetary Policy Stance in Sub-Saharan African Emerging and Frontier Markets Johanna Tiedemann, Olivier Bizimana, Shant Arzoumanian, 2025-08-15 This paper assesses the stance of monetary policy in eleven Sub Saharan African SSA emerging and frontier market economies We estimate neutral real interest rates using a range of methodologies and find a broadly declining trend in most economies since the Global Financial Crisis consistent with patterns observed in advanced and major emerging market economies We document significant heterogeneity in monetary policy stances measured by the interest rate gap even during common global shocks We also examine the consistency between signals from the intended monetary policy stance and broader financial conditions To this end we construct financial conditions indices FCIs and analyze their relationship with interest rate gaps We find that this relationship strengthens during periods of highly accommodative or restrictive monetary stances particularly in economies that have adopted or are transitioning to inflation targeting frameworks Moreover contractionary monetary shocks tighten financial conditions more in these economies than in those operating under other regimes

Competitive Capitalism and the Economic Crisis Spyros Sakellariopoulos, 2019-05-15. This book reviews the profound transformation to the Greek political economy in recent years and considers the reasons that have led to this transformation. Further, the author explores the social experimentation and social diversity that evolved as a result of the Greek and international economic crises. By challenging various assumptions made about the crisis, the author sheds light on Greek social relations and the country's particular type of capitalist development. This book will be of value to both economists and sociologists linking discussions about social class with economic, political and institutional analyses. *Remaking European Political Economies* Dennis Zagermann, 2023-12-18. From 2009 to 2015, the euro area of the European Union (EU) experienced an existential socio-economic crisis. To secure its institutional integrity, the EU designed several new institutions to support member states in need but also to facilitate socio-economic adjustments. The European Stability Mechanism (ESM) lies at the centre of this strategy; it provides financial assistance to member states in severe crisis on an intergovernmental basis while demanding compliance with adjustment programs from program countries. Based on a comparative political economic analysis, *Remaking European Political Economies* shows that the EU's financial assistance programs focused strongly on reforms that led to a partial convergence of program countries based on market-based economic governance and reduced governmental influence in the economy. The book draws on extensive empirically based case studies of two prominent euro area countries in crisis: Greece and Ireland. Dennis Zagermann illustrates that socio-economic models in the euro area can experience institutional change if exposed to severe crises in combination with financial assistance programs that include policy conditionality. In doing so, his book sheds light on the central question of whether there is a possible convergence of European models of capitalism, a question that has been at the centre of comparative political economic debates for over thirty years. *New Economic Constitutionalism in Europe* George Gerapetritis, 2019-10-31. *New Economic Constitutionalism in Europe* focuses on the institutional mutation of constitutionalism following the major economic crisis in the Eurozone and globally. The main axis is that a new economic constitutionalism has arisen which trespasses on the conventional conceptual foundations and needs to be addressed with novel institutional vehicles. The author proposes an original and searching analysis of the significant constitutional evolutions that have taken place in member states in response to the global financial crisis. The book combines a sophisticated theoretical model of a new form of economic constitutionalism with detailed practical argumentation. This important new work provides a valuable addition to the understanding of this hugely important topic. *Governance and Economic Growth in Nigeria* Saidat Ilo, 2023-10-24. *Governance and Economic Growth in Nigeria: The Role of China and the U.S. between 2001-2011* examines why Nigeria experienced steady economic growth in GDP between 2001-2011. Saidat Ilo argues that improved governance as well as the perceived competition between China and the

United States has impacted this growth She analyzes this perceived rivalry and their policies closely This book not only contributes to development theories by focusing and analyzing governance but it also goes a step further by filling a gap of contending theories which fail to consider the role governance plays in economic growth and progress particularly in the developing world Through in depth research Saidat Ilo discovers how China and the United States foreign policies influence decisions on foreign aid and trade in Nigeria She shows that there is a direct correlation between good governance and economic growth in Nigeria and provides policy recommendations based on this research China's Economic Development Lee Pei May, 2024-06-21 Through a rigorous examination of China's rise Lee addresses an important question Did China catch up Or more specifically can growth be automatically translated to catching up with the advanced industrialised countries or has it only allowed limited progress if any to be made To answer these queries and the broader question of the possibility of the Global South converging with the Global North four development theories are utilised with competing explanations to uncover the complexity and multifaceted development of China This includes whether China really has a unique developmental model to offer Positioning China within the global economy this book traces its developmental progress over time as well as its progress relative to other countries To understand whether the Chinese political economy is socialist or not Lee moves away from the orthodox definition of socialism and instead examines the official narrative of Socialism with Chinese Characteristics Lastly this book argues that though China is catching up challenges that could potentially block China's progress for a full catch up are to be anticipated A useful resource for students and scholars in the fields of international relations international political economy Chinese studies and development studies *Western Balkan Economies in Transition* Reiner Osbald, Will Bartlett, 2018-08-23 This book explores the economic and social development of the Western Balkan region a group of six countries that are potential candidates for EU membership It focuses on the key economic issues facing these countries including the challenge of promoting economic growth limiting public deficits and debt and fostering international trade relations Given the severe impact of the recent economic crisis on social welfare in the region it also investigates the nature and extent of social exclusion a factor likely to produce future political instabilities if not effectively addressed by a return to sustainable economic growth The contributions explore these issues in light of the major influence of EU policy instruments and advice which are currently guiding the economies along an accession trajectory to future EU membership The Economic Report of the President United States. Congress. Joint Economic Committee, 2015

The 1.5 Billion People Question Harold Alderman, Ugo Gentilini, Ruslan Yemtsov, 2017-10-12 Most of the people in low and middle income countries covered by social protection receive assistance in the form of in kind food The origin of such support is rooted in countries historical pursuit of three interconnected objectives namely attaining self sufficiency in food managing domestic food prices and providing income support to the poor This volume sheds light on the complex bumpy and non linear process of how some flagship food based social protection programs have evolved over time and how they currently work In

particular it lays out the broad trends in reforms including a growing move from in kind modalities to cash transfers from universality to targeting and from agriculture to social protection Case studies from Egypt India Indonesia Mexico Sri Lanka and United States document the specific experiences of managing the process of reform and implementation including enhancing our understanding of the opportunities and challenges with different social protection transfer modalities
