The study of economics is based upon needs and wants of an individual and three factors determine how an economy functions; consuming, producing and the sale of goods and services. A common example of this would be a shoemaker would make shoes for a baker (who was good at making bread, but not at shoes). This would be much more productive for an economy opposed to each individual making his/her own bread and shoes. If consumers didn't want shoes, they would demand fewer shoes, and the shoemaker
