The Rough Guide to Scotland Greg Dickinson, Brendon Griffin, Keith Munro, Darren (Norm) Longley, Helena Smith, Rob Humphreys, 2017-04-18 This in depth coverage of Scotland's local attractions sights and pubs takes you to the most rewarding spots from Loch Ness to Arthur's Seat to Edinburgh Castle and stunning color photography brings the land to life on the pages Discover Scotland's highlights with expert advice on exploring the best sites participating in festivals and exploring local landmarks through extensive coverage of this fascinating location Easy to use maps reliable advice on how to get around and insider reviews of the best hotels restaurants bars clubs and shops for all budgets ensure that you won't miss a thing Make the most of your time with The Rough Guide to Scotland [The Future of Post-Human Performing Arts](#) Peter Baofu, 2013-01-03 Are the performing arts really supposed to be so radical that as John Cage once said in the context of music there is no noise only sound since he argued that any sounds we can hear can be music WK 2007a D Harwood 1976 This radical tradition in performing arts with music as an example here can be contrasted with an opposing view in the older days when Greek philosophers and medieval theorists in music defined music as tones ordered horizontally as melodies and vertically as harmonies Music theory within this realm is studied with the presupposition that music is orderly and often pleasant to hear WK 2007a Contrary to these opposing traditions and other views as will be discussed in the book performing arts in relation to both the body and its presence is neither possible nor desirable to the extent that the respective ideologues on different sides would like us to believe Needless to say the challenge to these opposing traditions in performing arts does not imply that performing arts are worthless human endeavors or that those fields of study related to performing arts like aesthetics acoustics communication studies psychology culture studies sociology religion morality and so on should be rejected too Of course neither of these extreme views is reasonable Instead this book provides an alternative better way of understanding the future of performing arts especially in the dialectic context of the body and its presence while learning from different approaches in the literature but without favoring any one of them or integrating them since they are not necessarily compatible with each other In other words this book offers a new theory that is the transdisciplinary theory of performing arts to go beyond the existing approaches in a novel way If successful this seminal project will fundamentally change the way that we think about performing arts from the combined perspectives of the mind nature society and culture with enormous implications for the human future and what the author originally called its post human fate **The Complete Guide to Greener Meetings and Events** Samuel deBlanc Goldblatt, 2011-09-27 While there are many reasons to incorporate sustainable practices into meetings and events including saving costs and resources protecting the environment improving social issues doing business more efficiently and effectively and attracting new audiences the number one reason to go green is to do business better The book is divided into three parts which reflect defining principles of greener meetings and events Innovation Conservation and Education This book broadly explores sustainable management in the hospitality

Artistic Creation and Ethical Criticism Ted Nannicelli, 2020-05-05 Artistic Creation and Ethical Criticism a study in philosophical aesthetics investigates an idea that underpins the ethical criticism of art but that is rarely acknowledged and poorly understood namely that the ethical criticism of art involves judgments not only of the attitudes a work endorses or solicits but of what artists do to create the work The book pioneers an innovative production oriented approach to the study of the ethical criticism of art one that

will provide a detailed philosophical account of the intersection of ethics and artistic creation as well as conceptual tools that can guide future philosophizing and criticism Ted Nannicelli offers three arguments concerning the ethical criticism of art First he argues that judgments of an artwork's ethical value are already often made in terms of how it was created and examines why some art forms more readily lend themselves to this form of ethical appraisal than others He then asserts that production oriented evaluations of artworks are less contested than other sorts of ethical criticism and so lead to certain practical consequences from censure dismissal and prosecution to shifts in policy and even legislation Finally Nannicelli defends the production oriented approach arguing that it is not only tacit in many of our art appreciative practices but is in fact rationally warranted There are many cases in which we should ethically critique artworks in terms of how they are created because this approach handles cases that other approaches cannot and results in plausible judgments about the works relative ethical and artistic value The concise powerful arguments presented here will appeal to moral philosophers philosophers of art and aesthetics and critics interested in the intersection of artistic production and criticism and ethics
