 Thomas Williams Bicknell, Albert Edward Winship, Anson Wood Belding, 1895 Understanding Bible by Design G. Brooke
 Lester, 2014-11-01 Today's seminary and religious education instructors are expected to design and redesign their courses
 more nimbly than in the past. We have to adapt our courses to novel learning environments for more diverse learners toward
 more diverse vocations. At the same time, institutional rewards for time invested in course design are fewer than ever.
 Understanding Bible by Design introduces the reader to Understanding by Design, an approach to course design that is
 proven, time efficient, and grounded in the instructor's most closely held convictions about her subject matter's big ideas and
 essential questions. This book's contributors, one in Old Testament, one in New Testament, and one in Jewish Studies,
 demonstrate the value of Understanding Bible by Design for the Biblical Studies instructor, whether at seminary or university,
 face to face or online, from the intimate seminar to the massive MOOC. Lester's synopsis of course design and suggested
 action is followed by a collaborative dialogue with Jane S. Webster and Christopher M. Jones. Webster and Jones provide
 practical commentary regarding the successful implementation of Lester's proposed approaches. As a group, Lester, Webster,
 and Jones create a text that extends pedagogical innovation in inspiring but practical ways. **Essays in Humanistic**

 welcome manuscripts based on cutting edge research from a wide variety of theoretical perspectives and methodological
 orientations. The editorial team is particularly interested in working with international authors, authors from traditionally
 marginalized populations, and in work that is relevant to practitioners around the world. Growing numbers of educators and
 professors look to the six bimonthly issues to deal with problems directly related to contemporary school leadership practice.

 culmination of twenty years of the study on the principles of science. Noticing a widespread craving for philosophical light at
 a time of scant such offerings, Morris R. Cohen aimed to demonstrate here the fundamental and ancient connection between
 nature and science, between hearts and minds, in an attempt to salve the developing mutual hostility between the two in the
 1920s. The volume bears particular relation to George Santayana's *Life of Reason* and Bertrand Russell's *Principles of*
Mathematics and explores areas including the character of the insurgence against reason and reason in the contexts of the
 natural and social sciences. **Love Strong as Death** Ronald Walls, 2000 Love Strong as Death is a fascinating account of a
