while the program's research based reading approach ensures that no child is left behind **American Literature in Transition, 1960-1970** David Wyatt, 2018-09-13 The decade of the 1960s has come to occupy a uniquely seductive place in both the popular and the historical imagination While few might disagree that it was a transformative period the United States remains divided on the question of whether the changes that occurred were for the better or for the worse Some see it as a decade when people became more free others as a time when people became more lost American Literature in Transition 1960 1970 provides the latest scholarship on this time of fateful turning as seen through the eyes of writers as various as Toni Morrison Gary Snyder Michael Herr Amiri Baraka Joan Didion Louis Chu John Rechy and Gwendolyn Brooks This collection of essays by twenty five scholars offers analysis and explication of the culture wars surrounding the period and explores the enduring testimonies left behind by its literature **Quarterly Review of Military Literature**, 1980

Guide to American Literature from Its Beginnings Through Walt Whitman James T. Callow, Robert J. Reilly, 1976

Environmental Practice and Early American Literature Michael Ziser, 2013-07-29 This original and provocative study tells the story of American literary history from the perspective of its environmental context Weaving together close readings of early American texts with ecological histories of tobacco potatoes apples and honey bees Michael Ziser presents a method for literary criticism that explodes the conceptual distinction between the civilized and natural world Beginning with the English exploration of Virginia in the sixteenth century Ziser argues that the settlement of the New World and the cultivation and exploitation of its bounty dramatically altered how writers used language to describe the phenomena they encountered on the frontier Examining the work of Harriet Grainger Cooper Thoreau and others Ziser reveals how these authors whether consciously or not transcribed the vibrant ecology of North America and the ways that the environment helped codify a uniquely American literary aesthetic of lasting importance Education: Ends and Means Julius A. Sigler, 1997 In American

society the ends and means of education have been debated vigorously throughout its history Most Americans enthusiastically and eagerly supported the development of public education in the mid 19th century They perceived it to be a positive force for mobility and democracy While some complained that too much Obook learningO was a waste of time most Americans were delighted with the developments of the American educational system which appeared to be a foundation for our political system Environmental Virtue Ethics Philip Cafaro, Ronald Sandler, 2005-02-04 There is one certainty

regarding the human relationship with nature there is no getting away from it But while a relationship with nature is a given the nature of that relationship is not Environmental ethics is the attempt to determine how we ought and ought not relate to the natural environment A complete environmental ethic requires both an ethic of action and an ethic of character Environmental virtue ethics is the area of environmental ethics concerned with character It has been an underappreciated and underdeveloped aspect of environmental ethics until now The selections in this collection consisting of ten original and four reprinted essays by leading scholars in the field discuss the role that virtue and character have traditionally played in

environmental discourse and reflect upon the role that it should play in the future The selections also discuss the substantive content of the environmental virtues and vices and apply them to concrete environmental issues and problems This collection establishes the indispensability of environmental virtue ethics to environmental ethics It also enhances the breadth and quality of the ongoing discussion of environmental virtue and vice and the role they should play in an adequate environmental ethic

Environmental Evasion Lloyd Willis, 2012-01-02 How do we reconcile the abstract reverence for the natural world central to American literary history beginning with Ralph Waldo Emerson s Nature with over a century and a half of widespread environmental destruction Environmental Evasion examines the environmental implications of literary and cultural productions by writers from James Femimore Cooper and Henry Wadsworth Longfellow to Willa Cather John Steinbeck Ernest Hemingway and Zora Neale Hurston Lloyd Willis provocatively argues that the environmentalist outlooks by Cooper and Longfellow were eclipsed by Ralph Waldo Emerson s abstract imperialist vision of nature He demonstrates how many 20th century American writers have taken the Emersonian approach participating in a silent but extremely powerful form of evasive environmental politics in the ways in which they write about the natural world Attentive to the inherent political dimensions of all texts Environmental Evasion insists on the relevance of environmental history and politics to New Americanist approaches to the literary canon

Thoreau's Ecstatic Witness Alan D. Hodder, 2008-10-01 When Henry David Thoreau died in 1862 friends and admirers remembered him as an eccentric man whose outer life was continuously fed by deeper spiritual currents But scholars have since focused almost exclusively on Thoreau s literary political and scientific contributions This book offers the first in depth study of Thoreau s religious thought and experience In it Alan D Hodder recovers the lost spiritual dimension of the writer s life revealing a deeply religious man who despite his rejection of organized religion possessed a rich inner life characterized by a sort of personal experiential nature centered and eclectic spirituality that finds wider expression in America today At the heart of Thoreau s life were episodes of exhilaration in nature that he commonly referred to as his ecstasies Hodder explores these representations of ecstasy throughout Thoreau s writings from the riverside reflections of his first book through Walden and the later journals when he conceived his journal writing as a spiritual discipline in itself and a kind of forum in which to cultivate experiences of contemplative non attachment In doing so Hodder restores to our understanding the deeper spiritual dimension of
