Yet the seeming ubiquitous adoption of ICT has not made the technology's use any less controversial. There is much that is still puzzling and troubling about Information and Communication Technology and its impact on teachers and learners. *The Emperor's New Computer: ICT Teaching and Learning* presents nine chapters that reflect international points of view on the intersection of Information and Communication Technology and education, pose critical questions about ICT's use, and examine ways of navigating the complex paths that ICT has carved in all aspects of global education, society, and culture. **Mathematics and Mathematical Literacy** South Africa.
