Robin, 2013-11-01 The Fifth edition of the best selling communicatively based text for beginning Russian is enhanced by a greater focus on contemporary culture and simplified visual grammar explanations that will better engage your students. *Golosa A Basic Course in Russian 5e* strikes a true balance between communication and structure. It takes a contemporary approach to language learning by focusing on the development of functional competence in the four skills: listening, speaking, reading, and writing, as well as the expansion of cultural knowledge. It also provides comprehensive explanations of Russian grammar along with the structural practice students need to build accuracy. *Golosa* is divided into two books: Book 1 and Book 2, of ten units each. The units are organized thematically and each unit contains dialogs, texts, exercises, and other material designed to enable students to read, speak, and write about the topic as well as to understand simple conversations. The systematic grammar explanations and exercises enable students to develop a conceptual understanding and partial control of all basic Russian structures. This strong structural base enables students to accomplish the linguistic tasks and prepares them for further study of the language.

The Handbook of Technology and Second Language Teaching and Learning Carol A. Chapelle, Shannon Sauro, 2017-06-28 The Handbook of Technology and Second Language Teaching and Learning presents a comprehensive exploration of the impact of technology on the field of second language learning. The rapidly evolving language technology interface has propelled dramatic changes in and increased opportunities for second language teaching and learning. Its influence has been felt no less keenly in the approaches and methods of assessing learners' language and researching language teaching and learning. Contributions from a team of international scholars make up the Handbook, consisting of four parts: language teaching and learning through technology, the technology pedagogy interface, technology for L2 assessment and research, and development of technology for language learning. It considers how technology assists in all areas of language development, the emergence of pedagogy at the intersection of language and technology, technology in language assessment, and major research issues in research and development of technologies for language learning. It covers all aspects of language, including grammar, vocabulary, reading, writing, listening, speaking, pragmatics, and intercultural learning, as well as new pedagogical and assessment approaches and new ways of conceiving and conducting research and development. The Handbook of Technology and Second Language Teaching and Learning demonstrates the extensive multifaceted implications of technology for language teachers, learners, materials developers, and researchers.

Stalin's Terror of 1937-1938 Vadim Zakharovich Rogovin, 2009 This volume examines the bloodiest period of the Stalinist repression of political opposition in the Soviet Union debunking the myth that the Great Purges were merely the product of Stalin's paranoia and had no overriding political logic Through a meticulous examination of original sources including archival documents only made available for research in the 1990s Professor Vadim Rogovin argues that the ferocity of the mass repression was directly proportional to the intensity of resistance to Stalin within the Communist Party of the Soviet Union CPSU particularly the opposition inspired by and associated with the exiled Bolshevik leader Leon Trotsky Far from Trotsky being a politically isolated figure as both Stalinist and anti communist historians have claimed there was substantial sympathy for his criticism of the Stalin regime in the ranks and even in the leadership of the CPSU and support for his demands for inner party democracy greater social equality and an international orientation to the Bolshevik goal of world revolution It was this political fact as Rogovin demonstrates that accounts for the purge reaching so deeply into the party apparatus the military the Komsomol youth movement and the broader layers of the population Rogovin bases his analysis on scrupulous research quoting from newly translated or unpublished documents including memoirs meeting minutes newspaper articles and trial transcripts He documents the reaction of different social layers to the purges including workers peasants non party intellectuals and the CPSU rank and file This book includes rarely published photographs of the prison camps documenting the lives of those labeled by Stalin enemies of the people Chronologically this volume takes up where its predecessor 1937 Stalin's Year of Terror left off with the June 1937 plenum of the Central Committee that followed the purging of the Soviet military command and the execution of Marshal Tukhachevsky and other leading generals It analyzes such critical events as the Bukharin Rykov trial last of the infamous show trials the massacre of Trotskyists in the Vorkuta slave labor camp and the assassination by Stalinist agents of Leon Sedov Trotsky's son and other oppositionists outside the Soviet Union It concludes with an examination of how the purges transformed the CPSU and Soviet society as a whole

Negative Revolution Artemy Magun,2013-11-18 This

thought provoking work analyzes concrete political events and reinterprets key concepts in modern political science Building on the works of Kant Badiou Adorno Hegel and more it posits that the dynamics of revolution can be encapsulated in the concept of negation since a revolution essentially negates what is by rejecting the power in place The work argues that revolution is the true ground of Western democracy and that the proof of a true democracy is the activity of protest movements It discusses how modern philosophy conceives political truth as revolutionary or eventful and that one aspect of revolution is negativity which fluctuates between inertia and melancholia It examines the problem of revolution in the context of modern philosophy providing a diagnosis of the historical developments since the fall of the Soviet Union to the Arab Spring setting forth an original theory of revolution while shedding light on the notion of negativity in contemporary thought This innovative work will appeal to anyone interested in political theory and political philosophy
