History Of Mathematics Victor Katz 3rd Edition:

The History of Mathematics Victor J. Katz, 2003 Katz's text *A History of Mathematics: An Introduction* was originally published in 1993. This briefer version allows time enough to address 20th century topics before a one semester course is over. Biographical and ethnomathematics coverage have been cut and recent discoveries have been included. A working knowledge of one year of calculus is enough background for most of the book although the later chapters are a bit more demanding. Katz is affiliated with the U of the District of Columbia. by historians Uses actual source material as examples Features boxed summaries discussion questions and suggestions for further reading Supplements all major sourcebooks in mathematics history Designed for easy reference Ideal for students and teachers

Rethinking the Needham Question Raymond W. K. Lau, 2024-12-24 This book offers a new investigation of the Needham Question Why did modern science emerge in Europe but not in any of the advanced non European civilizations Eurocentric accounts attribute it to certain qualities said to be unique to Europe Opposed to the Eurocentric view is a position known as the dialogical perspective Dialogism argues that Europe borrowed heavily from non European scientific knowledges and that scientific exchanges were key to the development of modern science Neo Eurocentric arguments have emerged in response to the challenge of dialogism and the debate between Eurocentrism neo Eurocentrism and dialogism currently stands at a stalemate In this book Raymond Lau brings a new theoretical methodological framework to finally settle this debate The historical analysis developed here shows that to secure the non Eurocentric case and decisively rebut Eurocentrism and neo Eurocentrism it is necessary to go beyond dialogism both theoretically and methodologically
