

INSTALLATION AND SETUP GUIDE

GENERAL INFORMATION

The ADEMCO 6160PX is an addressable Remote Keypad with a built-in Proximity Reader, and is intended for use with ADEMCO control panels.

Basic features of the Keypad

- 2-line Alpha display
- Backlit Display (programmable as permanent on some controls; see the control's instructions for details)
- Continuously Backlit Keys for convenience
- Programmable Function Keys
- Built-in Sounder (speaker)
- Arm/Disarm via Prox Tag
- LED Indicators for Armed and Ready-To-Arm
- Supervised by control panel (if supported)
- Uses two keypad addresses

MOUNTING AND WIRING

The Keypad can be surface mounted directly to a drywall, or to a single- or double-gang electrical box.

1. Push the two case release snaps at the bottom of the Keypad with the blade of a medium screwdriver, then pull that side of the case back away. Insert the screwdriver in the side of the Keypad (between the front and back case) and gently twist to release the side locking tab. Repeat for the other side. Refer to Figure 1 for location of the case back release snaps and locking tabs.
2. Route wiring from the control panel through the opening in the case back.
3. Mount the case back to a wall or electrical box.
4. Wire directly from the Keypad's terminal block to the terminal block on the control panel. (See Wiring Table below). **Connect only the red and black Aux. Power connections at this time.**

Do not connect the ECP Data In or Data Out until directed to do so. If the keypad's Prox Reader detects the presence of ECP Data In and Out connections during address programming mode, it will exit to "normal" mode.

NOTE: No more than one wire per terminal may be connected. If daisy-chained configuration is required, pigtail wires together so that only one wire is terminated under the screw. Use 16-24 AWG wire only!

5. Reattach the Keypad to its case back.
6. If the Keypad and Prox Reader addresses have not yet been programmed, refer to the Setting the Keypad and Prox Reader Addresses section and set the two addresses.
7. After the Keypad and Prox Reader addresses have been programmed, remove the Keypad from its back plate again (see step 1 above) and connect the green and yellow (data in/data out) wires from the control.
8. Reattach the Keypad to its case back.

Installation Notes

- The Keypad can only be used on addressable systems and must be set for address 00-30 (16-23 for VISTA-15P / VISTA-20P and VISTA-21iP controls).
- The Prox Reader uses an additional keypad address, which must be enabled at the control panel (see control panel installation instructions for allowable keypad addresses).
- The partition used for the Keypad, Prox Reader, and user security code must be the same.
- The Prox Tags will only arm and disarm one partition. The Prox Reader cannot be used to perform global arming operations.
- For optimal performance, use only the Prox Tags provided. For additional Prox Tags, order PROXTG-BK (Black) or PROXTG-GY (Gray).

Figure 1. Removing the Case Back

Wiring Table

Keypad	Control Panel	Wire Color
▲G	Data In	Green
—	- Aux. Pwr (GND)	Black
—	+ Aux. Pwr	Red
▼Y	Data Out	Yellow

See the control panel's Installation and Setup Guide for more complete details.
