reputation for academic excellence and diversity serving as a model for how white and Black Americans can thrive together Meckler herself a product of Shaker Heights takes a deeper look into the place that shaped her investigating its complicated history and its ongoing challenges in order to untangle myth from truth She confronts an enduring and troubling question if Shaker Heights has worked so hard at racial equity why does a racial academic achievement gap persist In telling the stories of the Shakerites who have built and lived in this community Meckler asks What will it take to fulfill the promise of racial integration in America What compromises are people of all races willing to make What does success look like and has Shaker achieved it The result is a complex and masterfully reported portrait of a place that while never perfect has achieved more than most and a road map for communities that seek to do the same Includes black and white images [Resources in Education](#) ,1995 **Children's Books in Print** ,1993 *Directory of Distance Learning Opportunities* Modoc Press, Inc.,2003-02-28 This book provides an overview of current K 12 courses and programs offered in the United States as correspondence study or via such electronic delivery systems as satellite cable or the Internet The Directory includes over 6 000 courses offered by 154 institutions or distance learning consortium members Following an introduction that describes existing practices and delivery methods the Directory offers three indexes Subject Index of Courses Offered by Level Course Level Index Geographic Index All information was supplied by the institutions Entries include current contact information a description of the institution and the courses offered grade level and admission information tuition and fee information enrollment periods delivery information equipment requirements credit and grading information library services and accreditation [California Notes](#) ,1981 *Making Math Accessible for the At-Risk Student* Linda Lee Ptacek,2011-01-14 This invaluable collection of activities and strategies will empower teachers to help students who are struggling with math Every day secondary math teachers face classrooms containing students with a wide range of abilities yet each child is expected to meet the same testing standards Special education teachers are often asked to collaborate in classrooms outside of their curricular areas providing accommodations and modifications Both math teachers and special education instructors can benefit from effective alternative presentation strategies specifically designed for students struggling with math Making Math Accessible for the At Risk Student comprises organizational instructional and motivational activities that are adaptable across grade levels This cornucopia of best practice strategies and resources is designed to help at risk students achieve standards in math The first six chapters discuss the most common reasons adolescent and preadolescent students struggle with math and present techniques to keep these students engaged in the classroom The remainder of the book is a treasure trove of activities that utilize the instructional strategies with specific content to help all students succeed
