

# 1974-1982 Corvette Horn Wire Diagram.

Horn test is simple, apply direct 12 volts to the horn. If the horn blows its good, if not then run a ground jumper from horn case to ground and apply 12 volts again. If horn blows, remove and clean ground brace, reinstall.

If the horn is good, then verify continuity from the green horn wire to the relay connector under the dash. If good then test the red wire for 12 volts. If no continuity exist then check bulk head connection or find the break in the wire.

At the relay connector, jump 12 volts from Red to Green. The horn should blow. If continuity exist between A and B then you should replace relay.

Remove the upper contact and touch A to ground. If the horn blows, the issue is the upper contact. If the horn doesn't blow, test continuity from A to B. If no continuity exist, find the break in the wire.
