CENTAUR SC1

ELECTRONIC CENTRAL HEATING CONTROL

PLEASE READ THIS LEAFLET CAREFULLY
BEFORE USING YOUR CENTAUR SC1

1

INTRODUCTION

The Centaur SC1 is an electronic, 24 hour central heating time control; extremely reliable and easy to operate. Properly programmed, the Centaur SC1 will help you save energy and create a comfortable environment in your home.

The Centaur SC1 has the following features:

- 3 ON and 3 OFF periods every 24 hours with override programme options of CONSTANT, ALL DAY, AUTO and OFF.
- An ADVANCE button allowing an instant switch from ON to OFF, or from OFF to ON, without affecting normal settings.
- A BOOST button providing a 1 hour boost when required.

Setting, programming and using the Centaur SC1 is easy. All you have to do is follow these step by step instructions. You will not need the help of an electrician, and no tools are needed.

2

SET BUTTONS, INDICATORS AND SYMBOLS

Most of the control buttons on your Centaur programmer are dual purpose buttons.

They can be used either as PROGRAMME buttons for selecting override programmes, advance and boost facilities or as SET buttons for inputting time of day, on/off times, etc.

The diagram below (figure 1) can be used to identify the SET buttons, indicators and symbols referred to in sections 3 and 4 of this leaflet.

SETTING THE TIME OF DAY

NOTE: When setting time of day or switch times, if a period exceeding 60 seconds is allowed to elapse between button presses, then the programmer will automatically revert to the RUN mode and any changes made since the last press of the enter button will not be saved.

- Press the SELECT button once so that the SET INDICATOR is pointing to the CLOCK position on the front of the programmer. The time of day display will now flash (see figure 2).

Fig. 2

- Use the ADJUST buttons (+ or -) to alter the display to the correct time of day, making sure that the AM/PM symbol is also correct (see figure 3).

Fig. 3

3

Continued

NOTE: By pressing and releasing the ADJUST buttons you advance or retard the time in one minute steps. If you keep the button depressed for a few seconds the display will fast cycle and the time can be changed more rapidly.

- Now press the ENTER button.

4

SETTING THE "ON" AND "OFF" TIMES

NOTE: The ON/OFF times can be set at 10 MINUTE intervals.

The programmer already contains a factory pre-set program of ON/OFF times in its memory. These are based on the most commonly used settings and are shown below.

1st	ON: 6.00 A.M.	1st	OFF: 8.30 A.M.
2nd	ON: 12.00 P.M.	2nd	OFF: 12.00 P.M.
3rd	ON: 5.00 P.M.	3rd	OFF: 10.00 P.M.

If these settings do not suit your requirements they can easily be changed as follows.
