Functions and special functions in commercial vehicle modelling Jürgen Ritter, Miniaturization and the availability of special components make many things possible, especially in commercial vehicle modelling. A few years ago one was happy if a model drove at all, but today there is hardly any original function that cannot be reproduced in the model. One model builder who does this with enthusiasm is Jürgen Ritter. Whether with his road trucks or his much acclaimed agricultural machinery models, his models are always filled with special functions and special ideas. In this book he shows his unusual construction methods, exciting ideas for special functions and how these can be realized, often with simple means. So spice up your model with the help of this richly illustrated reference book.

Wide Band Gap Semiconductor Nanowires 2 Vincent Consonni, Guy Feuillet, 2014-08-08. This book, the second of two volumes, describes heterostructures and optoelectronic devices made from GaN and ZnO nanowires. Over the last decade the number of publications on GaN and ZnO nanowires has grown exponentially, in particular for their potential optical applications in LEDs, lasers, UV detectors or solar

cells So far such applications are still in their infancy which we analyze as being mostly due to a lack of understanding and control of the growth of nanowires and related heterostructures Furthermore dealing with two different but related semiconductors such as ZnO and GaN but also with different chemical and physical synthesis methods will bring valuable comparisons in order to gain a general approach for the growth of wide band gap nanowires applied to optical devices
