

HYPOTHESIS

A hypothesis is a tentative statement or explanation that proposes a possible relationship between variables and is subject to testing and verification.

OVERVIEW

A hypothesis is a testable prediction that seeks to explain a phenomenon or make a statement about the relationship between variables. It is formulated based on prior knowledge, observations, or theories. Hypotheses serve as a starting point for scientific investigation, and their validity is assessed through empirical evidence.

EXAMPLES

Null Hypothesis: The null hypothesis is a statement that suggests no significant relationship or effect between variables.

Alternative Hypothesis: The alternative hypothesis is a statement that proposes a specific relationship or effect between variables, challenging the null hypothesis.

Hypothesi Practical Term2014 Life Sciences
