,1979 *Transfer Society* David N. Laband,2001-11-25 How much time money and other resources do Americans devote to influencing the distribution of wealth According to David Laband and George McClintock a conservative estimate of the total amount Americans spend on arranging or preventing forced transfers is more than 2 000 for every man woman and child in America That s not a statement of the amount forcibly redistributed but of the amount spent in effecting the forcible transfer of resources And as the authors show this is a very conservative estimate of the dead weight losses associated with the transfer society Through an ambitious cataloguing of different categories of expenditures on forced transfers and research into the amounts expended on each one Laband and McClintock present a more complete picture of the effects of forced transfers than one would get from merely considering the aggregates of federal and state budgets or estimates of the amounts of wealth that change hands through the various forms of freelance redistribution such as insurance fraud theft or extortion After a careful examination of the measurable forms of dead weight losses the authors conclude by noting that the numbers they present understate the magnitude of resource expenditure on transfer activity in the United States Moreover the authors discuss the important question of why relative to the huge amounts of wealth transferred by government at all levels there is so little observable and measurable expenditure on effecting transfers This book both poses problems and offers solutions to important issues in economics and political science **When the Moon Is Red** Philip L.
