Hendricks, 2023-08-29 The notion of care is at times misunderstood in the context of music education equated simply with kindness or associated with lowered expectations and is often dismissed without consideration of its full value to music learning When viewed through a student deficit perspective concepts of care might evoke unnecessary pity or a sense of rescue thereby positioning teachers and learners in a superior inferior relationship that may be unhealthy and unhelpful to either person Furthermore many well meaning approaches to care emphasize a unidirectional relationship from teacher to student discounting the ways in which a teacher also continues to learn and develop A more empowering conceptualization of care in music education involves sharing sharing experience sharing passion sharing excitement sharing goals and sharing humanness The Oxford Handbook of Care in Music Education addresses ways in which music teachers and students interact as co learners and forge authentic relationships with one another through shared music making Concepts of care addressed in the handbook stem from philosophies of relationship feminist ethics musical meaningfulness and compassionate music teaching These essays highlight the essence of authentic relationships and shared experiences between teachers and learners extending previous conceptions of care to meet the needs of contemporary music learners and the teachers who care for about and with them *Research Anthology on Music Education in the Digital Era* Management Association, Information Resources, 2022-02-11 Music is a vital piece of life that not only allows individuals a chance to express themselves but also an opportunity for people and communities to come together Music has evolved in recent years as society turns toward a digital era where content can be shared across the world at a rapid pace Music education and how it is spread has a number of possibilities and opportunities in this new era as it has never been easier for people to access music and learn Further study on the best practices of utilizing the digital age for music education is required to ensure its success The Research Anthology on Music Education in the Digital Era discusses best practices and challenges in music education and considers how music has evolved throughout the years as society increasingly turns its attention to online learning This comprehensive reference source also explores the implementation of music for learning in traditional classrooms Covering a range of topics such as music integration personalized education music teacher training and music composition this reference work is ideal for scholars researchers practitioners academicians administrators instructors and students *Simplifying Research in Music* Samidha Vedabala, 2021-08-14 Title Simplifying Research in Music Author Samidha Vedabala Publisher Wizard Publisher Book Details ISBN 978 81 949076 4 0 Size 15 24 X 22 86 X 4 CM About the book Very few people knew that I am writing this book Even I could not imagine that I

will come up with such a book so early As always there are few people behind a person who do the things I first of all will mention those three people Firstly Himanshu my husband this is his idea It was just a few months back when the research methodology lectures started around March I was making my notes for class He said Write every lecture in detail you can make it a book later I didn't know this can be materialized in July Secondly my Guruji Pandit Sanjoy Bandopadhyay who is always an inspiration for almost everything in my life He deserves special thanks as he only had confidence which I didn't have on me Thirdly Dr Krishnendu Dutta My colleague at Sikkim University He has just blind confidence in me He only asked me to do it just now And I did thank You Sir The time when this book was being written was tough in every one's life India was fighting with the second wave of COVID 19 With lots of stress and worry of losing one of the dearest members of the family sometimes I was writing with tears in my eyes In this journey two of my dearest students Manisha and Saraswati who were with me for almost three months have helped me a lot in nearly everything They are the witness of all the sentences pages I was improving Every diagram I was doing Thanks a lot Dear God bless you My mother and sister were worrying every day about how will I finish my work My MPhil and PhD student Who unknowingly are the very first inspiration for this book to happen And to my little sitar student Shradha Sharma who has designed the cover page Special thanks to the wizard publisher especially Saiyed Junaid to bear with my delay submitting the manuscript and materializing it

Perspectives on Artistic Research in Music Robert Burke, Andrys Onsman, 2017-01-23 The increasing interest in artistic research especially in music is throwing open doors to exciting ideas about how we generate new musical knowledge and understanding This book examines the wide array of factors at play in innovative practice and how by treating it as research we can make new ideas more widely accessible Three key ideas propel the book First it argues that artistic research comes from inside the practice and exists in a space that accommodates both objective and subjective observation and analyses because the researcher is the practitioner It is a space for dialogue between apparently opposing binaries the composer and the performer the past and the present the fixed and the fluid the intellectual and the intuitive the abstract and the embodied the prepared and the spontaneous the enduring and the transitory and so on It is not so much constructed in a logical sequential manner in the way of the scientific method of doing research but more as a braided space woven from many disparate elements Second the book articulates the notion that artistic research in music has its own verification procedures that need to be brought into the academy especially in terms of the moderation of non traditional research outputs including the description of the criteria for allocation of research points for the purposes of data collection as well as real world relevance and industry engagement Third by way of numerous examples of original and creative music making it demonstrates in practical terms how exploration and experimentation functions as legitimate academic research Many of the case studies deliberately cross boundaries that were previously assumed to be rigid and definite in order to blaze new musical trails creating new collaborations and synergies
