Carbon Pricing John Quiggin, David Adamson, Daniel Quiggin, 2014-04-25 In 2012 Australia took the major step of introducing a carbon price involving the creation of a system of emissions permits initially issued at a fixed price Carbon Pricing brings together experts instrumental in the development and operation of A **Capacity Mechanisms in the EU Energy Market** Leigh Hancher, Adrien de Hauteclercq, Malgorzata Sadowska, 2015-09-24 Ensuring an adequate long term energy supply is a paramount concern in Europe EU member states now intervene by encouraging investment in generation capacity offering an additional revenue stream for conventional power plants in addition to the existing heavily subsidised investments in renewable energy sources These capacity remuneration mechanisms or simply capacity mechanisms have become a hot topic in the wider European regulatory debate European electricity markets are increasingly interconnected so the introduction of a capacity mechanism in one country not only distorts its national market but may have unforeseeable consequences for neighbouring electricity markets If these mechanisms are adopted by several member states with no supra national coordination and no consideration for their cross border impact they may cause serious market distortions and put the future of the European internal electricity market at risk This book provides readers with an in depth analysis of capacity mechanisms written by an expert team of policy makers economists and legal professionals It will be a first point of reference for regulators and policy makers responsible for designing optimal capacity mechanisms in Europe and will be an invaluable resource for academics and practitioners in the fields of energy regulation and competition **Environment, Energy and Applied Technology** Wen-Pei Sung, Jimmy C.M. Kao, 2015-01-29 This proceedings volume brings together selected peer reviewed papers presented at the 2014 International Conference on Frontier of Energy and Environment Engineering Topics covered include energy efficiency and energy management energy exploration and exploitation power generation technologies water pollution and protection air pollution and **Economic Change in Asia** M. Bruna Zolin, Bernadette Andreosso-O'Callaghan, Jacques Jaussaud, 2016-08-12 Since the 2008 global economic crisis East Asian economies have faced a number of macroeconomic issues including China's new growth model the middle income trap in developing East Asian countries and the growing natural fibre market and its socio economic implications This book addresses these key topical issues which East Asian economies are facing today Written by international experts in the area of Asian economics and business it presents the most recent macroeconomic outlook in the region and then goes on to analyse a number of business corporations and industry related cases focussing on the theme of firms strategies Examining the links between environmental and financial performance corporate social responsibility and the transfer of environmental management financial accounting standards the relationship between corporate sustainability activities and corporate profit and the different cultural approaches towards business ethics this book provides both practical strategies and new theoretical

insights As such it will appeal to students scholars and practitioners interested in Asian business and economics *The International Committee of the Red Cross and its Mandate to Protect and Assist* Christy Shucksmith, 2017-08-24 The purpose of this book is to consider the legality of the changing practice of the International Committee of the Red Cross ICRC It provides extensive legal analysis of the ICRC as an organisation legal person and humanitarian actor It draws on the law of organisations International Humanitarian Law International Human Rights Law and other relevant branches of international law in order to critically assess the mandate and practice of the ICRC on the ground The book also draws on more abstract human centric concepts including sovereignty as responsibility and human security in order to assess the development of the concept of humanity for the mandate and practice of the ICRC Critically this book uses semi structured interviews with ICRC delegates to test the theoretical and doctrinal conclusions The book provides a unique insight into the work of the ICRC It also includes a case study of the work of the ICRC in the Democratic Republic of Congo Ultimately the book concludes that the ICRC is no longer restricted to the provision of humanitarian assistance on the battlefield It is increasingly drawn into long term and extremely complicated conflicts in which civilians soldiers and non State actors intermingle In order to remain useful for the people on the ground therefore the ICRC is progressively developing its mandate This book questions whether on occasion this could threaten its promise to remain neutral impartial and independent Finally however it should be said that this author finds that the work of the ICRC is unparalleled on the international stage and its humanitarian mandate is a vital component for those embroiled in the undertaking of and recovery from conflict Law and Corporate Behaviour Christopher Hodges, 2015-10-22 This book examines the theories and practice of how to control corporate behaviour through legal techniques The principal theories examined are deterrence economic rational acting responsive regulation and the findings of behavioural psychology Leading examples of the various approaches are given in order to illustrate the models private enforcement of law through litigation in the USA public enforcement of competition law by the European Commission and the recent reform of policies on public enforcement of regulatory law in the United Kingdom Noting that behavioural psychology has as yet had only limited application in legal and regulatory theory the book then analyses various European regulatory structures where behavioural techniques can be seen or could be applied Sectors examined include financial services civil aviation pharmaceuticals and workplace health safety Key findings are that enforcement has to focus on identifying the causes of non compliance so as to be able to support improved performance rather than be based on fear motivating complete compliance Systems in which reporting is essential for safety only function with a no blame culture The book concludes by proposing an holistic model for maximising compliance within large organisations combining public regulatory and criminal controls with internal corporate systems and external influences by stakeholders held together by a unified core of ethical principles Hence the book proposes a new theory of ethical regulation This title is included in Bloomsbury Professional s International Arbitration online service **ICICKM2014-Proceedings of the 11th**
