Preparing STEM Teachers

Joanne E. Goodell, Selma Koç, 2020-09-01 STEM project based instruction is a pedagogical approach that is gaining popularity across the USA. However, there are very few teacher education programs that focus specifically on preparing graduates to teach in project based environments. This book is focused on the UTeach program, a STEM teacher education model that is being implemented across the USA in 46 universities. Originally focused only on mathematics and science, many UTeach programs are now offering engineering and computer science licensure programs as well. This book provides a forum to disseminate how different institutions have implemented the UTeach model in their local context. Topics discussed will include sustainability features of the model and how program assessment, innovative instructional programming, classroom research, and effectiveness research have contributed to its success. The objectives of the book are: To help educators gain insight into a teacher education organizational model focused on STEM and how and why it was developed; To present the theoretical underpinnings of a STEM education model, i.e. deep learning, conceptual understanding; To present innovative instructional programming in teacher education, i.e. project-based instruction, functions and modeling; research methods; To present research and practice in classroom and field implementation and future research recommendations; To disseminate program assessments and improvement efforts.

The Concerns Based Adoption Model (CBAM)

Gene E. Hall, 2025-04-01 Change can be interesting, challenging, easy, difficult, and sometimes fun. The Concerns Based Adoption Model (CBAM) Constructs Evidence, Applications, and Implications for Facilitating Change, edited by Gene E. Hall, a key originator of CBAM, uses a research tested model to introduce students in education to ways of thinking, strategies, and steps that leaders can take to facilitate and advance change processes in their own schools. The primary focus of this book and method is on understanding the thoughts, perceptions, feelings, and concerns of the people who are engaged with change and finding systematic ways to address them. This edited volume provides clear instruction from researchers who know CBAM best, experiences, and case studies from a wide variety of educational settings, and strong pedagogy so readers can learn CBAM and apply this model to their educational systems.

Transparency in Assessment - Exploring the Influence of Explicit Assessment Criteria

Anders Jönsson, Frans Prins, 2019-04-03 In many schools and higher education institutions, it has become common practice to share assessment criteria with students. Sometimes it is required for accountability purposes, at other times criteria are used as a means to communicate expectations to students. However, the idea that explicit assessment criteria should be shared with students has been contested. On the one hand, research has shown that explicit criteria may positively affect student performance, reduce their anxiety, as well as support students' use of self-regulated learning strategies. On the other hand, there are fears that explicit criteria may have a restraining influence on students' learning, as well as limiting their autonomy and creativity. There are also indications of students becoming more performance oriented, as opposed to learning oriented, when being provided with explicit assessment criteria. Taken together, it is not fully understood

under which circumstances it is productive for student learning to share explicit assessment criteria and under which circumstances it is not In particular empirical research on the proposed negative effects of sharing criteria with learners is limited and most fears voiced in the literature are based on individual experiences and anecdotal evidence In this book we therefore bring different perspectives on transparency in assessment together in order to further our understanding of how students are influenced by the use of explicit assessment criteria A deeper understanding of the influence of explicit assessment criteria on students understanding of criteria motivation and learning is equally imperative for future research and educational practice both of which need to go beyond individual opinions and convictions
