Access to Scientific Research David J. Brown, 2015-11-13 The debate about access to scientific research raises questions about the current effectiveness of scholarly communication processes This book explores from an independent point of view the current state of the STM publishing market new publishing technologies and business

models as well as the information habit of researchers the politics of research funders and the demand for scientific research as a public good The book also investigates the democratisation of science including how the information needs of knowledge workers outside academia can be embraced in future *Thinking and Acting Systemically* Alan Daly, Kara Finnigan, 2016-05-19 This volume argues that districts are important as a lever for change given the limited success of school by school efforts Policies that focus on skill development recognize and support performance create opportunities for collaboration build leader capacity and create networks of knowledge sharing hold great potential for improving districts but it will require a paradigm shift in the way we view our public school system and those who work within it away from blame and toward complex systems change Failure Up Close Jay P. Greene, Michael Q. McShane, 2018-01-17 For many reasons failure in education reform is rarely admitted Even though it is incredibly hard work to try and improve the enormous and diverse American education system because there are political consequences of admitting that a particular effort did not live up to its promises and pressure from philanthropic funders to show success unsuccessful efforts are often swept under the rug or papered over with public relations efforts that avoid wrestling with the tough realities of educational improvement This doesn't help anyone As any educator will tell you failure is an essential part of learning Insofar as education reform needs to be a learning movement itself it has to be able to admit where it has failed and learn from it *Failure Up Close* engages a select group of scholars from across the ideological spectrum to examine particular education reform efforts of recent years that have not succeeded and offer lessons for school and system improvement that can be learned from them Rather than view failure as negative this volume looks at failure as an opportunity to learn and grow In fact the editors endeavored to find authors that would analyze reforms for which they had some fundamental sympathy The goal is not to bash particular efforts or castigate their supporters but rather to help those supporters understand how to do what they do better and ultimately do better for children Collected Papers. Volume VI Florentin Smarandache, 2022-01-15 This sixth volume of *Collected Papers* includes 74 papers comprising 974 pages on theoretic and applied neutrosophics written between 2015-2021 by the author alone or in collaboration with the following 121 co-authors from 19 countries Mohamed Abdel Basset Abdel Nasser H Zaid Abdullah Gamal Amir Abdullah Firoz Ahmad Nadeem Ahmad Ahmad Yusuf Adhami Ahmed Aboelfetouh Ahmed Mostafa Khalil Shariful Alam W Alharbi Ali Hassan Mumtaz Ali Amira S Ashour Asmaa Atef Assia Bakali Ayoub Bahnasse A A Azzam Willem K M Brauers Bui Cong Cuong Fausto Cavallaro Ahmet evik Robby I Chandra Kalaivani Chandran Victor Chang Chang Su Kim Jyotir Moy Chatterjee Victor Christianto Chunxin Bo Mihaela Colhon Shyamal Dalapati Arindam Dey Dunqian Cao Fahad Alsharari Faruk Karaaslan Aleksandra Fedajev Daniela G fu Hina Gulzar Haitham A El Ghareeb Masooma Raza Hashmi Hewayda El Ghawalby Hoang Viet Long Le Hoang Son F Nirmala Irudayam Branislav Ivanov S Jafari Jeong Gon Lee Milena Jevti Sudan Jha Junhui Kim Ilanthenral Kandasamy W B Vasantha Kandasamy Darjan Karabac evi Song I Karabatak Abdullah Karg n M Karthika Ieva Meidute Kavaliauskiene Madad Khan Majid Khan Manju Khari Kifayat

Deterrence: Examining the Evidence Keith B. Payne, James Schlesinger, 2016-04-14 The National Institute for Public
Policy's new book **Minimum Deterrence Examining the Evidence** is the first of its kind Dr Keith Payne former Secretary of
Defense James Schlesinger and an unparalleled bipartisan group of senior civilian and military experts critically examine
eight basic assumptions of Minimum Deterrence against available evidence In general Minimum Deterrence does not fare
well under the careful scrutiny Proponents of a Minimum Deterrent US nuclear force posture believe that anywhere from a
handful to a few hundred nuclear weapons are adequate to deter reliably and predictably any enemy from attacking the
United States now and in the future Because nuclear weapons are so destructive their thinking goes no foreign leader would
dare challenge US capabilities The benefits advocates claim of reducing US nuclear weapons to the minimum level needed
are better relations with Russia and China reinforcement of the arms control and Nonproliferation Treaty billions of defense
dollars in savings and greater international stability on the way to nuclear zero As political pressure builds to pursue this
vision of minimum US deterrence **Minimum Deterrence Examining the Evidence** stands as the seminal study to address the
many claims of great benefit using available evidence This book was published as a special issue of Comparative Strategy
