Mathematics N6 April 2011 Question Paper Memoranda:

Ballistics 2011 Ernest Baker,Douglas Templeton,2011-09 Includes papers that were first presented at a September 2011 conference organized by the National Defense Industrial Association and the International Ballistics Society This title includes a CD ROM that displays figures and illustrations in articles in full color along with a title screen and main menu screen Federal Register ,2013-07 Market Microstructure Frédéric Abergel,Jean-Philippe Bouchaud,Thierry Foucault,Charles-Albert Lehalle,Mathieu Rosenbaum,2012-04-03 The latest cutting edge research on market microstructure Based on the December 2010 conference on market microstructure organized with the help of the Institut Louis Bachelier this guide brings together the leading thinkers to discuss this important field of modern finance It provides readers with vital insight on the origin of the well known anomalous stylized facts in financial prices series namely heavy tails volatility and clustering and illustrates their impact on the organization of markets execution costs price impact organization liquidity in electronic markets and other issues raised by high frequency trading World class contributors cover topics including analysis of high frequency data statistics of high frequency data market impact and optimal trading This is a must have guide for practitioners and academics in quantitative finance **South African national bibliography** ,1999 Classified list with author and title index **Automatic Item Generation** Mark J. Gierl,Thomas M. Haladyna,2013 Automatic item generation AIG represents a relatively new and unique research area where specific cognitive and psychometric theories are applied to test construction practices for the purpose of producing test items using technology The purpose of this book is to bring researchers and practitioners up to date on the growing body of research on AIG by organizing in one volume what is currently known about this research area Part I begins with an overview of the concepts and topics necessary for understanding AIG by focusing on both its history and current applications Part II presents two theoretical frameworks and practical applications of these frameworks in the production of item generation Part III summarizes the psychological and substantive characteristics of generated items Part IV concludes with a discussion of the statistical models that can be used to estimate the item characteristics of generated items features one future application of AIG describes the current technologies used for AIG and also highlights the unresolved issues that must be addressed as AIG continues to mature as a research area Comprehensive The book provides a comprehensive analysis of both the theoretical concepts that define automatic item generation and the practical considerations required to implement these concepts Varied Applications Readers are provided with novel applications in diverse content areas e g science and reading comprehension that range across all educational levels elementary through university *African American Officers in Liberia* Brian G. Shellum,2018-08-01 African American Officers in Liberia tells the story of seventeen African American officers who trained reorganized and commanded the Liberian Frontier Force from 1910 to 1942 In this West African country founded by freed black American slaves African American officers performed their duties as instruments of imperialism for a country that was

at best ambivalent about having them serve under arms at home and abroad The United States extended its newfound imperial reach and policy of Dollar Diplomacy to Liberia a country it considered a U S protectorate Brian G Shellum explores U S foreign policy toward Liberia and the African American diaspora while detailing the African American military experience in the first half of the twentieth century Shellum brings to life the story of the African American officers who carried out a dangerous mission in Liberia for an American government that did not treat them as equal citizens in their homeland and he provides recognition for their critical role in preserving the independence of Liberia

Cognitive Communication and Cooperative HetNet Coexistence Maria-Gabriella Di Benedetto, Faouzi Bader, 2014-01-16 This book written by experts from universities and major industrial research laboratories is devoted to the very hot topic of cognitive radio and networking for cooperative coexistence of heterogeneous wireless networks Selected highly relevant advanced research is presented on spectrum sensing and progress toward the realization of accurate radio environment mapping biomimetic learning for self organizing networks security threats with a special focus on primary user emulation attack and cognition as a tool for green next generation networks The research activities covered include work undertaken within the framework of the European COST Action IC0902 which is geared towards the definition of a European platform for cognitive radio and networks Communications engineers R D engineers researchers and students will all benefit from this complete reference on recent advances in wireless communications and the design and implementation of cognitive radio systems and networks

Sub-structure Coupling for Dynamic Analysis Hector Jensen, Costas Papadimitriou, 2019-03-26 This book combines a model reduction technique with an efficient parametrization scheme for the purpose of solving a class of complex and computationally expensive simulation based problems involving finite element models These problems which have a wide range of important applications in several engineering fields include reliability analysis structural dynamic simulation sensitivity analysis reliability based design optimization Bayesian model validation uncertainty quantification and propagation etc The solution of this type of problems requires a large number of dynamic re analyses To cope with this difficulty a model reduction technique known as substructure coupling for dynamic analysis is considered While the use of reduced order models alleviates part of the computational effort their repetitive generation during the simulation processes can be computationally expensive due to the substantial computational overhead that arises at the substructure level In this regard an efficient finite element model parametrization scheme is considered When the division of the structural model is guided by such a parametrization scheme the generation of a small number of reduced order models is sufficient to run the large number of dynamic re analyses Thus a drastic reduction in computational effort is achieved without compromising the accuracy of the results The capabilities of the developed procedures are demonstrated in a number of simulation based problems involving uncertainty

Drawing Futures Bob Sheil, Frédéric Migayrou, Luke Pearson, Laura Allen, 2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and

architecture Despite numerous developments in technological manufacture and computational design that provide new grounds for designers the act of drawing still plays a central role as a vehicle for speculation There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation Drawing Futures will present a compendium of projects writings and interviews that critically reassess the act of drawing and where its future may lie Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments The book coincides with an international conference of the same name taking place at The Bartlett School of Architecture UCL in November 2016 Bringing together practitioners from many creative fields the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas
