A Birder's Guide to Michigan Allen T. Chartier, Jerry Ziarno, 2004 Many birders come to Michigan with the intention of adding Kirtland's Warbler to their life lists but the state should by no means be dismissed as a one species wonder Surrounded by four Great Lakes Michigan boasts 3 000 miles of shoreline Add the additional habitat afforded by 11 000 interior lakes 36 000 miles of rivers and streams and the largest state forest system in the nation and it's not surprising that Michigan's official bird list now stands at 421 species A Birder's Guide to Michigan describes over 200 sites with details on each site's birds best seasons and driving directions accompanied by 200 plus maps Thoroughly researched bar graphs describe the seasonal status and abundance of the state's regularly occurring species and an annotated list of specialties will guide birders to some of North America's most sought after species A bonus is an appendix listing the state's amphibians and reptiles butterflies and dragonflies mammals and orchids

The Amphibians and Reptiles of Michigan J. Alan Holman, 2012 Holman uniquely bridges the gap between neo and paleoherpetology and shows that Michigan's modern herpetofaunas reflect Pleistocene ice age and Holocene warm period after the ice age events as the entire modern population was forced to re invade the state after the last withdrawal of ice In Part 1 Holman discusses Michigan as an amphibian and reptile habitat

including a geological climatic and vegetational history Part 2 presents recent species accounts covering all fifty four species of amphibians and reptiles along with their general distribution Michigan distribution with range maps geographic variation habitat and habits reproduction and growth diet predation and defense interaction with humans behavioral characteristics population health and general remarks In Part 3 Holman examines the Michigan herpetofauna in Quaternary and recent historical times and the species accounts include Pleistocene Holocene and archaeological records
