that amidst the trend of deglobalization it is important for China to leverage its advantages in economies of scale to improve both the efficiency and security of industry chains. By examining the current state of global trends, international trade and industrial policies, the book outlines potential pathways of the development of global supply chains and provides insights on the challenges and opportunities for China. This book also focuses on strategically important sectors in the digital green logistics and manufacturing industries, presenting an in-depth discussion of the prospects of each industry chain. Being both readable and academically rigorous, this book is well suited for readers from the fields of public policy, economics, finance, and for those who seek to better understand the reshaping of China's industry chains. The work cites information from various sources, including academic journals, policy institutions, and a network of primary sources such as industry experts and renowned academics.

Advancements in Smart City and Intelligent Building Qiansheng Fang, Quanmin Zhu, Feng Qiao, 2019-04-03. The book entitled *Advancements in Smart City and Intelligent Building* is the Proceedings of the International Conference on Smart City and Intelligent Building ICSCIB 2018 held in Hefei, China, September 15-16, 2018. It contains 58 papers in total, categorized into 8 different tracks: Building Energy Efficiency, Construction Robot and Automation, Intelligent Community and Urban Safety, Intelligentization of Heating Ventilation Air Conditioning System, Information Technology and Intelligent Transportation Systems, New Generation Intelligent Building Platform Techniques, Smart Home and Utility, and Smart Underground Space, which cover a wide range of areas of smart cities and intelligent buildings. ICSCIB2018 provided an international forum for professionals, academics, and researchers to present the latest developments from interdisciplinary theoretical studies, computational algorithm developments, and engineering applications in smart cities and smart buildings. This academic event featured many opportunities to network with colleagues from around the world in a wonderful environment. Its program covered invitation and presentations from scientists, researchers, and practitioners who have been working in the related areas to establish platforms for collaborative research projects in these fields. The conference invited leaders from industry and academia to exchange and share their experiences, present research results, explore collaborations, and to spark new ideas with the aim of developing new projects and exploiting new technology in these fields and bridge theoretical studies and emerging applications in various science and engineering branches. This book addresses the recent development and achievement in the field of smart city and intelligent building. It is primarily intended for researchers and students for undergraduate and postgraduate programs in the background of multiple disciplines, including computer science, information systems, information technology, automatic control, and automation, electrical and electronic engineering, and telecommunications, who wish to develop and share their ideas, knowledge, and new findings in smart city and intelligent building.

The Restructuring of Global Value Chains Yunshi Mao, 2022-05-26. This book discusses the feasible breakthrough of emerging economy enterprises in participating the international division of labor led by developed countries and gradually standing at the top end of the value chain based on a deep understanding of the

practice and upgrading opportunities of Chinese enterprises On the basis of re understanding the theory of global value chains this book puts forward and expounds the concept of restructuring the global value chain This book analyzes the background motivations paths and effects of enterprises in emerging economies to reconstruct the global value chain and develops a theoretical system to explore the deep seated logic behind enterprise upgrading This book concludes that the transformation and upgrading of Chinese enterprises are the most critical initiatives in seeking a new balance in the world economy This book involves dozens of manufacturing enterprise cases in Chinese mainland and Taiwan It is of great value to the research and policy study of enterprise upgrading and the participation in global competition China Resurrected Frans-Paul van der Putten, 2025-06-12 China's rise to superpower is seemingly a modern phenomenon but it has a long history This book follows China's geopolitical transformation on the world stage from struggling to defend herself against the British in the Opium Wars to rivalling the United States for supremacy What started as a response to Europe's colonial influence has gradually become China's quest to take a leading role on the world stage But how did this happen And what kind of actor is China as a global great power The answers to these questions lie in how China has been shaped by its changing relationships with major world powers over the last two centuries Arguing that a series of military defeats in the Opium Wars Boxer Crisis and Japanese occupation led to a deep rooted national sense of geopolitical vulnerability van der Putten shows how this imbalance of power has resulted in Chinese distrust and uncertainty even after it ceased to be prey to imperialist powers Tracing China's relations with other major powers over the last 185 years *China Resurrected* shows how they have influenced the way in which China itself has become a leading power and what this means for its relations with the West *China Versus the West* Ivan Tselichtchev, 2011-12-27 *China Versus the West* is an innovative book The author a leading specialist on the international and Asian economy and business presents the most comprehensive picture of the changing power balance between the emerging superpower China and the old developed economies of the West mainly the US Europe and Japan The reader can clearly see in what areas and to what extent China has become the world leader in what areas it is catching up and in what areas the West retains its superiority and has a chance to strengthen it further At the same time I Tselichtchev unveils a breath taking story of the global economy and business in the brave new world which is non West led and where major growth dynamics are coming from large emerging economies A radically changing economic environment requires new government policies and business strategies The book contains many valuable suggestions and ideas Using his own analytical framework the author presents a set of options and alternatives for Western businesses in the wake of China's production and export offensive The book provides a uniquely sharp and thought provoking analysis of the factors behind the global crisis of 2008 2009 largely different from what we see in other publications and examines its implications for the global power balance I Tselichtchev vividly shows that it was not global but Western crisis of a structural character which drastically changed the China West power balance in the former's favor He provides strong

arguments showing that today's China is structurally and macro economically stronger than most countries of the West. This leads him to rethinking the very essence of the Chinese model of capitalism and to its new definition. He expresses unconventional, sometimes controversial but well founded views about China's problems and weaknesses and the prospects for its political evolution. The book ends with invaluable insights into China's unique role in the world economic history, the essence of the non-West led multipolar world and the positions of its major players. Arguing that from now on no single country will be ever able to rule the world, it shows new opportunities dynamic China is opening for the West. Thoroughly analyzing and discussing a wide range of the key, often complicated issues which are now in the focus of the world's attention, the book remains very reader friendly. It is written in the form of an unconstrained dialogue with the reader, containing a lot of the author's on the spot impressions, interesting facts, remarks and quotations. *China Versus the West* is a must reading for everyone who wants to know more about the global developments, China and the West, and also perhaps to get valuable inputs and hints to find his or her own place in today's new world. It is highly recommended for policy makers, business people, academics, analysts and journalists. It is a valuable source for professors and students of the universities and business schools.
