Foundations For Efficient Web Service Selection:

Foundations for Efficient Web Service Selection Qi Yu,Athman Bouguettaya,2009-09-02 Foundations for Efficient Web Service Selection describes the foundational framework for efficient Web service selection It lays out a theoretical underpinning for the design of models and algorithms for searching and optimizing access to Web services Excerpts from Prof Fabio Casati s foreword This excellent book looks at the search problem from a broader perspective Instead of narrowing down on a specific aspect or subproblem of service search it dissects and analyzes the fundamental problems in search and presents concrete applicable solutions as well as the theoretical foundations behind them One aspect I found particularly significant in the book is the mind shift it generates from thinking about service modeling for the sake of supporting deployment or invocation to modeling for supporting search This design for search approach is exactly what we do when we design databases because search is what we worry about in that case and there is no reason why this shouldn t be the case for services if we want services to be searchable with a similar effectiveness Agile and Lean Service-Oriented Development: Foundations, Theory, and Practice Wang, Xiaofeng,Ali, Nour,Ramos, Isidro,Vidgen, Richard,2012-11-30 Challenges in unpredictable markets changing customer requirements and advancing information technologies have lead to progression towards service oriented engineering and agile and lean software development These prevailing approaches to software systems provide solutions to challenges in demanding business environments Agile and Lean Service Oriented Development Foundations Theory and Practice explores the groundwork of service oriented and agile and lean development and the conceptual basis and experimental evidences for the combination of the two approaches Highlighting the best tools and guidelines for these developments in practice this book is essential for researchers and practitioners in the software development and service computing fields *Web Services Foundations* Athman Bouguettaya,Quan Z.
