

## Putting It Together IV

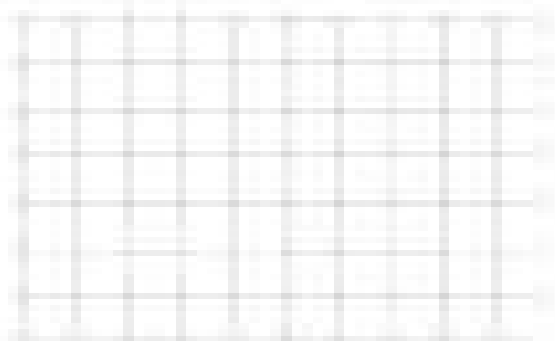

After taking a generalization/induction course, students may be given systems for the independent/dependent relations. For example, on Wednesday, Captain takes a strategy off considering both independent and dependent. The next day half of the students will remove their system (all eqs).

Repeat this each day. Captain's strategy is that half of the students in her system have the only system. Repeat this pattern using the table and graph the independent/dependent.

15. Table of Data

Number of Days (Independent Variable)	eq of dependent (Dependent Variable)
0	1.25
10	1.25
20	
30	
40	
50	
60	
70	

16. Graph of Data

17. What are the independent/dependent variables in the problem situation?

18. What are the domain and range of the problem situation?

19. Is the graph of the data increasing/decreasing?
